

## GALLES TROOPS CONQUER REBELS UNDER URBALEJO

## Victory Paves Way for Combined Campaign Against Torreon by Two Federal Chieftains

MEXICO CITY, March 10. (AP)—Defeat of Gen. Urbalejo and his rebel detachment at Canitas, State of Zacatecas, officially was announced here tonight.

The rebel general is said to have fled with an escort of thirty men before the victorious advance of the Federal troops, whose campaign was under the personal direction of Secretary of War Calles.

The capture of Canitas, strategic rail junction, opens the way

largest rebel bodies is concentrated.

Meanwhile Federal General Juan A. Almazan ordered an advance of his command from Monterrey westward toward Torreon.

**DOUBLE ATTACK**

If this movement is carried out successfully the rebels will face attacks from two sides.

The government announcement says that Torreon and also the city of Durango are expected to fall to the Federals within from twenty-four to forty-eight hours.

Presumably Gen. Calles plans to send part of his force to attack Durango, where Urbabejo has added troops, while the other force moves against Gen. Gonzalo Zeco-bar at Torreon.

The government says that Gen. Jesus M. Aguirre, rebel commander who fled Vers Cruz in defeat, has telegraphed an offer to surrender if the government allows him safe passage out of the country. The government replied that his surrender must be unconditional. It promised

Bonora revolutionary leaders today over seized government telegraph wires said that the southern district of Baja California joined the Mexico revolutionary movement at midnight last night.

Gov. A. de Aguirre of the southern district has informed revolt chiefs that 1300 soldiers who have espoused the revolutionary cause are on their way today by boat to Guaymas, Son., to join the revolutionary army on its march south toward Mexico City.

The northern district of Baja California, under Gov. Abelardo Rodriguez, still waits. Possibility of a clash between the two remote bases has a strong range separates their provinces.

Except for its mountainous border with the United States, the

**TROOPS SHIFTED**

Rebel forces are bestirring themselves to meet the northward advance of Gen. Calles's Federal army from the coast state of Quintana Roo. Aguirre's lieutenants and into the State of Yucatán, revolutionary headquarters here said. A rapid shifting of 2000 rebel troops from the southern west coast state of Chiapas to Yucatán was announced by Gen. Francisco Borques, rebel chieftain here, as now under way.

The shifting of rebel troops from the coast to Chihuahua is a surprise move, interpreted by observers to indicate that Gen. Calles's advance by way of Agua Calientes and the coast is being watched.

Rebel forces, however, were a broad smile when he received the foreign correspondents at Chaparral, the Mexican Communist Secretary of Agriculture and official spokesman for government, said: "The revolution is over in Vera Cruz and just about over in the State of Yucatán."

**GUARDS ORGANIZED**

Kron's guards, consisting of civilian volunteers armed by the government, are being organized in several States. Press dispatches said today that 6000 home guards soon will be on the war footing in the State of Sinaloa. Other Cuicatan battalions already are armed and ready for the field in the State of Guanajuato.

Calles's attitude to the government continues to indicate that much satisfaction is felt at the attitude

the main push of the rebel forces has been directed, has caused a shifting of revolutionary plans. Gen. [Name] in permitting the Federal government to purchase arms and ammunition, while continuing the embargo on such shipments to the

**READY TO FIGHT** An army supposed to number about 2000 men under the rebel general, Roberto Cruz, is reported to be advancing south along the

eral forces under Gen. Jaime Carrillo, now reported somewhere in the vicinity of Mazatlan. Last reports received here from the rebel army on the west coast indicate the revolutionary troops to be mass-

defense troops needed in the north-

ern campaign.

No further word has come from

the rebel general, Jesus M. Aguirre,

who is fleeing through the wilds

of the Sierrita de Toluca.

One of his supporters in the State

of Vera Cruz, Gen. Vidal Lagunes,

is reported to have been captured

and executed at Alvarado.

Jose Vasconcelos, Presidential can-

didate whose campaign committee

had been in the city, arrived here

this afternoon and was

greeted by a peaceful demonstra-

tion by more than 10,000 fol-

lowers. The capital popular news-

paper, which is the only one of

the situation, which chiefly

is confined to the communists of

the government.

REBELS MARCHING

ONWARD TO TORREÓN

JUARZ (Chihuahua, M.),

March 10. (P)—Victorious rebel

troops who conquered Juarez in a

sanitary five-hour skirmish last

Friday, were today en route to

inforce the revolutionary army near

Torreón in Southern Chihuahua,

where a decisive clash is expected

within a few days with a large

government force.

Three troop trains departed for

the south during the night to join

the concentration under command

of Gen. Miguel Valle, the rebel

chiefdom who led the assault on

Juarez. Reports received through

Montana National Railway sources

in Juarez, declare that two trains

of rebel troops are en route to

this city to replace those assigned

to duty in the south.

Quiet resumed Sunday in Juarez,

the "key city" of the conflict in

Chihuahua, where rebels withdrew

down the principal thoroughfare

in the battle for possession Friday.

A large crowd took part in

the scene of a baseball game

today. Streets were crowded but

few Americans were seen mingling

with the Mexicans.

Historic Guadalupe Mission, in

which no services have been con-

ducted for more than two years,

was visited by many Mexicans and

some American sightseers. There

were no services. Rebel officials in

control of the city announced they

are not opposed to services being

conducted, but one authority de-

clared today that the clergy will be

permitted to comply with govern-

ment regulations before the resump-

tion of services is permitted.

Revolutionary authorities today

traveled at the official staff of the

city. Alfredo Priar, former colonel

in the forces of the late Pancho

Villa, and former Chief of Police,

has been appointed collector of

customs. Francisco Perea was ap-

pointed director of National Rail-

ways.

BORDER TOWN SEIZED

Word has reached here that the

rebel forces have taken possession

of Pecos, Chihuahua, the border

town opposite Columbus, N. M.,

which was made famous by the raid

of Francisco (Pancho) Villa in 1916.

Automobiles carrying about forty

men came in from the south last

night and the men captured the

place. No resistance was offered

and a shot was fired. Federal

customs officers moved across the

line into the United States.

Departure of the troop trains for

the south today was marked by the

beating of a big Indian drum and

a general demonstration. Soldiers

showed, apparently enjoying the

prospects of the forthcoming bat-

tle, whistles and army bugles

added to the tumult. About 300

soldiers left on the trains and it

is estimated that an equal number

remained in Juarez.

Before his departure, Gen. Valle

was asked whether he is in favor

of opening the churches and his

reply was that he has nothing to

do with that question.

VICTORY FORECAST

"The churches are there and if

people want to go to them, that is

their privilege," he said. "If any

persons have any grievances as a

result of the revolution, let them

come to me and I will try to do

what we can to remedy it."

Aurelio Manrique, former Gov-

ernor of Pecos, arrived last night

as a liaison representative between

rebels in Northeastern and North-

ern Mexico. He predicted that with-

in three weeks the rebels will have

taken Mexico City. Manrique left

for the south soon after his arrival.

A message was made public

from the rebel headquarters here

Gen. J. C. Rosales, the rebel can-

didate for President, charging that

Gen. Matias Ramos, Federal com-

mandant, who was driven from

Juarez, sought to draw the ire of

the United States against the re-

bels by taking up a troop position

so that revolutionary forces would

be forced to fight during the attack

on the city. Gen. Ramos and his

command of approximately 300 men

were intended to hold off at Fort

Blanco, across the border.

ATTACK PLANNED

When the city was attacked, the

Federal forces fled to the bank of

the Rio Grande, a bare 100 yards

from the city line of El Paso.

Rebels were unable to

train their guns in their direc-

tion for fear of menacing the Amer-

ican city where great crowds had

the border to watch the battle.

Rebel leaders announced that 10-

000 revolutionary soldiers will join

the concentration movement at

Torreón, from where an attack will

be delivered against the Federal

army headed by Gen. Francisco Elias

Calles, in a decisive attack on the

city of Mexico.

Federal and rebel forces are ex-

pected to clash within a few days

at San Juan, Pecos. If the en-

gagement occurs, it probably will

take shape as the first important

fight of the rebellion. Revolutionary

leaders said that if the Federal

army is successful at San Juan, they

will try to press the Federal bat-

tle toward the capital.

GEN. VIDAL LAGUNES

REPORTED EXECUTED

VERA CRUZ, March 10. (P)—A

dispatch to El Estero from Al-

varado today says Gen. Vidal La-

gunes, who launched an uprising

against the government, was cap-

tured and executed by government

forces commanded by Gen. Calles

at Juarez.

Gen. Lagunes, the dispatch states,

was sought at Alvarado south of

here, and captured by a court-mar-

shal of having come to aid Gen.

Aguirre, now fleeing southward after

retreating from Vera Cruz.

Federal troops are continuing

their pursuit of Gen. Aguirre's band,

the newspaper declares, and have

captured some prisoners.

The port of Vera Cruz again is

open to international shipping and

foreign vessels are beginning to

arrive here.

REBELS CONTINUE

ADVANCE ON MEXICAN

CULIACÁN (Sinaloa) (Via Nogales,

Ariz.) March 10. (P)—Gen. Leopoldo

Rabatte with the Tenth Rebel Bat-

talion, Gen. Vicente Toranzo with the

Thirty-seventh Battalion, Gen. Mo-

lises Jordan with the Sixtieth and

Gen. Crisostomo M. Vazquez with

the Sixty-second are advancing rap-

idly on Mazatlán. Reports received

from Mazatlán say that Gen. Jaime

Carrillo has his Federal troops

aboard trains read to evacu-

ate as soon as the advance of the

rebel forces comes in sight. Yaqui

Indians are en route to the

scene of the impending conflict and

a new unit of 400 men has gone

down out of the hills under com-

mand of Gen. Simon Jago to join

the rebel troops.

Two aviators, believed to be Fed-

eralists, landed to the rear of Gen.

Hurbe's troops last night. Revolu-

tionary officers, fearing that an at-

tempt to battle him up at Mazatlán

and continue the advance to

Mexico City around him.

Gov. Macario Gaxiola is reported

to have been seen by the Federal

troops during their retreat through

Sinaloa, and to have been taken to

Mazatlán.

Gen. Hurbe and his staff visited

Gen. Cruz in his cavalry camp last

night and conferred on final plans

for the push toward Mazatlán.

YAQUI INDIANS

SEND DRUM MESSAGE

EL PASO, March 10. (P)—The

story of how Yaqui Indians who

were in the rebel forces that took

Juarez last on their drums a mes-

sage to follow Yaqui members of

the Federal garrison on the night

before the battle in the city, was

told today.

Charles E. Escudero, reporter for

the newspaper El Continental, re-

ceived the information from Maj.

# CENTENARIAN HAS GOOD EYES YET

At Least, He Says He Prefers  
Short Skirts to Today's  
Style of Long Age

SALT LAKE CITY, March

10. (P)—N. V. Reeves, who

celebrated his 104th birthday

here today, doesn't long for

the "good old days."

On the contrary, today he

declared his liking for modern

feminine dress, including

short skirts and bare legs in

summer.

"I do not think the girls

of today are more beautiful

than those of sixty years

ago," he said, "but I do think

their dresses are more attrac-

tive."

F. Pontones, paymaster of the

troops of Gen. Miguel Valle, the

rebel commander.

According to the story, the Yaquis

conveyed a signal to the Federal

garrison telling their fellows in

blood to abandon their posts

and come across to the rebel lines. They

signaled:

"Your brothers in arms are call-

ing you to come without fail to

the Twenty-seventh Battalion."

As a result of this message the

rebel forces were able to enter

the heart of Juarez without

serious resistance, it is declared by

rebel

### SON OF LAST TURKISH SULTAN BECOMES ROAMING MUSICIAN

BUDAPEST (Hungary) March 10. (P)—Prince Abdul Kadir, favorite son of the last Sultan Abdul Hamid, who might be sitting on the throne of Turkey if the monarchy had endured, applied today for a job as musician in a cafe here. His fortune of \$50,000,000 is gone and he has been deserted by his six former wives.

far as to predict war between the two countries.

"There is a struggle between two gigantic capitalist forces now being waged with the world as its arena," he said. "The United States and England wage a violent, but so far economic fight."

"One must not be particularly far-seeing or a political Bolshevik to foresee that a solution of the aggravated English-American controversies lies in the long run in the path of armed conflict. This clash will, in force and violence, end all the bloody slaughters recorded in the history of mankind."

On defections within the Communist party, Voroshilov admonished his hearers to nip in the bud any manifest tendency to the right.

### WILBUR SLATED EDUCATION HEAD

Hoover Plans New Federal Department  
Dixon May Become Interior Secretary

Reorganization to Conserve \$500,000,000

WASHINGTON, March 10. (Exclusive)—President Hoover, it was learned today, contemplates initiating at an early date the reorganization of the administrative departments of the government and the creation of an eleventh department—education, health and public welfare—headed by a member of the Cabinet. It is in this connection that the name of Joseph M. Dixon, former Governor of Montana and former United States Senator, for Assistant Secretary of the Interior.

The prevalent surmise is that Secretary of the Interior Wilbur, who is both an educator and a medical authority, will head the new department.

There is widespread doubt that Mr. Dixon could have been prevailed upon to accept a subordinate position in the Interior Department had there not been the prospect of his early elevation to its head.

Centralize Bureaus  
The eleventh department of the administrative branch of the government is to be formed by combining the public health service, which will be detached from the Treasury Department, and the Bureau of Education, which will be separated from the Interior Department and added thereto.

In his observations on education in his inaugural address, Mr. Hoover echoed the arguments of the National Education Association and others who have urged the establishment of a Federal department of education.

"Although education is primarily a responsibility of the States and local communities, and rightly so," said Mr. Hoover, "yet the nation as a whole is vitally concerned in the development everywhere to the highest standards and to complete universality."

The Department of Education bill favored by the National Education Association, was introduced in the last Congress by Representative Robinson, Republican, Kentucky. Its declared purpose is "to aid and encourage the public schools and promote the public educational facilities of the several States and Territories, without regard to race, creed or color, shall have larger educational and thereby abolish illiteracy, make more general the diffusion of knowledge and provide for the general welfare."

The bill directs the secretary of education "to make studies, investigations and researches showing the condition and progress of education in the several States and Territories and to make this information available to the public, to officials and all others interested in education in order to aid and encourage the people of the several States and Territories to establish more efficient schools and school systems, and to devise better methods of organization, administration and financing of education, to develop better types of school buildings and provide for their use to improve methods of teaching and develop more adequate curricula and courses of study."

OPPOSED BY CATHOLICS  
Legislation to establish a department of education is opposed chiefly by the Catholic Church, which fears that the innovation would be an opening wedge to Federal control of education and the imposition of unwelcome standards or regulations upon parochial schools.

No less significant than his inauguration observations on education were the remarks of Mr. Hoover on public health.

"Public health service should be as fully organized and as universal as the public education system," he said. "The returns are a thousand fold in economic benefits and infinitely more in reduction of suffering and promotion of human happiness."

It is not unlikely that the President will ask Congress to provide for a commission to work out a reorganization of the government departments. The administrative branch as it exists today is a hodgepodge of bureaus, offices and commissions with overlapping duties and activities, the whole structure encumbered with antiquated and costly methods of procedure. Estimates of the saving to be effected by a thorough-going reorganization run as high as \$500,000,000 a year.

### Seven in Poland Slain by Bandits

WARSAW (Poland) March 10. (P)—Seven persons, including three children, were reported today to have been slain by Lithuanian bandits who crossed the border and raided an isolated farm near Dubno.

### ENDURANCE FLIGHT ATTEMPT ABANDONED

BAY CITY (Mich.) March 10. (P)—Eddie Stinson and Randolph G. Page today abandoned their third attempt within the last two weeks to better the airplane endurance flight record. Their plane, the Sally Sovereign, made a successful take-off from the lot at Baginaw Bay at 1:30 o'clock this morning but motor trouble forced a landing two hours later.

### JOBS FOR SOLDIERS

HAVANA (Cuba) March 3. (P)—Cuba's latest economy move is to give the army a job in peace time. Soldiers will be used for the purpose of clearing the census.

### COOLIDGE WISH RESPECTED

Paper of Alma Mater Used Up Fifteen Words to Tell of Arrival Back Home

SPRINGFIELD (Mass.) March 10. (P)—Calvin Coolidge's frequently expressed wish to be allowed to return quietly to private life was respected in the current issue of the college paper of his alma mater. The Amherst Student carried among the alumni notes for the class of 1895:

"Calvin Coolidge has returned to his home at Northampton after an extended stay in Washington."

The paper carried no other comment on the career of the distinguished alumnus.

### LONELY KING DEPARTS ON LOVE QUEST

Boris, Incog, With Royal Train, Off for Rome to Woo Italian Princess

SOFIA (Bulgaria) March 10. (P)—Bulgaria's lonely and unmarried King, Boris, left here today on a trip to Western Europe and while his itinerary is a closely guarded secret it is believed that he is going to Rome to conclude plans for his marriage to Princess Giovanna of the House of Savoy.

While the King travels incognito as Count Rulsky he is attended by a large suite of his military and civilian householders and is accompanied by his sister, Princess Eudoxia, who also is unmarried. The royal party will travel through Rumania and Czechoslovakia.

It is considered significant that the King's trip to the West coincides with the presence in Rome of Archbishop Stephen of Sofia, head of the Bulgarian national church, and the early arrival in the Holy City of Cardinal Mysterio, who now is attending the League of Nations sessions at Geneva.

### TESTIMONY ADVERTISING DENOUNCED

Magazine Says Puffs by Celebrities Form One of Evils Hurting Confidence

NEW YORK, March 10. (P)—A protest against what it terms "the current flood of so-called testimonial advertising signed by stage stars, sport celebrities, society figures and others," made by the Magazine Sales Management in its current issue.

The magazine charges such advertising with the evil of "which are undermining public confidence in all advertising," and in a message sent to C. C. Younggren, president of the International Advertising Association, proposes that body set up an "audit bureau of advertising" to protect newspaper and magazine publishers from the advertising industry and the public by passing on all advertisements which raise the question of misrepresentation or exaggeration of fact.

The magazine offers a contribution of \$1000 toward the establishment of such a bureau.

### Island's Leader Explains Stand Against Tariff

WASHINGTON, March 10. (P)—Denying reports that Philippine leaders have relinquished their claims for immediate independence, President Quezon of the Philippine Senate, in a cablegram made public by the Philippine Press Bureau here today, declares he is opposed to the imposition of a tariff by this country on the islands' products only so long as the United States retains the Philippines.

The proposed tariff restriction, Quezon says, "has convinced us more than ever that immediate independence will not only be politically beneficial to us, but in the long run, will have less injurious economic effect than the indefinite continuation of the present status for the present economic relations between America and the Philippines are subject to change by Congress at any time."

### New Height Mark for Light Plane

COLORADO SPRINGS (Colo.) March 10. (P)—Piloted by O. R. (Ted) Hauser, a monoplane today set what is believed to be an altitude record for ninety-horsepower planes, when it crested over the summit of Pikes Peak at a height of nearly 12,000 feet.

One altimeter registered 10,000 feet, another slightly less, Hauser said. He was accompanied by a passenger. The plane was the first low-powered machine to cross the summit of the 14,000-foot mountain. Hauser descended with feet nearly frozen.

### ONE DEAD, ONE DYING IN STRANGE MISHAP

PHOENIX, March 10. (P)—J. E. Wise of Chicago was killed and his wife was perhaps fatally injured late this afternoon when their automobile was wrecked by a falling rock on a steep hillside east of Phoenix. The wheel of a passing car threw a rock which struck Wise in the face, causing him to lose control of his machine, which plunged from the highway and overturned.

### DUCE APPROVES PACT WITH POPE

Mussolini Publicly Accepts Church-State Treaty

Both Gainer, Neither Loser, He Tells Assembly

Premier Sole Speaker at Political Gathering

ROME, March 10. (P)—There is neither victor nor vanquished in the settlement of the Roman question, Premier Mussolini told the Quinquennial Assembly in the packed opera-house this afternoon, "but only absolute equity remedying the situation which had become dangerous and irksome."

This, his first public pronouncement on the conciliation of church and state, was the principal point in his speech and attracted the most attention and provoked the loudest applause.

The Premier emphasized that peace between the Italian government and the Vatican is an event of supreme importance, not only for Italy, but for the entire world. He pointed out a date which will remain famous in history when on February 11, by the Lateran treaty the Holy See "at last solemnly recognized the Italian kingdom under the House of Savoy with Rome as its capital."

PRaise FOR POPE  
Giving the other side of the picture, the Premier went on, saying: "We, on our part, logically recognized the sovereignty of the Pontiff and the Holy See which in reality already existed de facto." The Premier especially pointed out the generosity of Pope Pius XI, who, he said, asked for the smallest possible territory.

After having recognized the pre-eminence of the Catholic Church in the religious life of the Italian people which, he said, was perfectly natural, the Premier said that under a regime like Fascism it was superfluous to affirm that all other cults which heretofore were, according to the Constitution, only "tolerated" would be neither persecuted, suppressed nor annoyed.

NOT COMPULSORY  
"A Catholic state does not mean that citizens will be submitted to any pressure to follow a given religion or determine their faith, even though that be the same as that professed by a majority of the people," the Premier said.

Mussolini appeared in excellent health and his voice was strong. He walked on the stage after all the members of his Cabinet and the Grand Council were seated and 400 candidates for the lower House of Parliament had been placed. He was immediately the object of a monster demonstration from the packed house. Smilingly he allowed the vivas and handclapping for five minutes and then raised his hand in an imperious gesture for silence.

MUSSOLINI, NO. 1  
The whole scene was unique in the history of political rallies in Europe and so different from similar gatherings in the United States as to be almost totally foreign.

Probably for the first time in the history of a modern state all candidates for the nation's lower House of Parliament were assembled on the same stage—a single nationwide ticket for a single party—going to the polls as such on the 24th inst. There was only one speech and that was by No. 1 on the list—Mussolini.

### The Safest Investment

In Southern California today is a conservative first trust deed on residences in its best residential section—Beverly Hills, Wilshire, Hollywood, Brentwood, Santa Monica, etc.

OUR FULL PAID INVESTMENT CERTIFICATES 6% PRINCIPAL & INTEREST GUARANTEED BY US

are secured by just such investments, and are still further secured by our Guarantee Capital Stock and entire assets of the Association.

They answer all the requirements of the conservative investor:

1. Guaranteed safety of principal and interest.

# AIRLINES SHOW HEAVY INCREASE

Passenger Gain for 1928 Set at 420 Per Cent

Mileage Doubled, According to Air Chamber

Nine Express Routes Begun, Figures Reveal

NEW YORK, March 10. (AP)—Air transport companies in the United States covered 10,473,624 miles on scheduled routes in 1928 with a fleet of 364 planes and carried 55,634 passengers, according to aircraft year book figures made public today by the Aeronautical Chamber of Commerce. The 1928 figures embrace an increase of 420 per cent in passengers and 100 per cent in mileage over 1927.

# ATTACK JAZZ-AGE PROBLEMS

National Scientific Body Organized to Deal With Acoustics in All Its Phases, Including Radio and Talking Pictures

NEW YORK, March 10. (AP)—A national scientific body which will bring together in a new way the men and the commercial organizations dealing with sound is in process of formulation in the United States.

Within it, such unrelated fields as beautiful music, guarding children against deafness, acoustics in buildings, sound problems of the radio and movies, telephones, speech and the propagation of vibrations through mechanical systems will be

united from a common point of view. Its scope is to increase and diffuse knowledge of acoustics in all phases.

The new organization took tentative form at a meeting of forty men here during the annual convention of the American Association for the Advancement of Science.

A temporary organization was formed and a meeting will be held in New York April 17 and 18 to establish permanently the Acoustical Society of America. It is proposed that any person interested in acoustics shall be eligible to membership.

9451 miles were added during the year and sixteen mail lines were established or extended, an aggregate of 5928 miles. Nine express lines covering 3161 miles were launched.

The great increase was distributed by the chamber to the trebling during the year of air-mail pound-

# GENEVA MEET'S PROBLEM TOLD

American Adherence Hinges on Veto Power

United States as Member Ardently Desired

Personality of Elihu Root Impresses Delegates

GENEVA, March 10. (AP)—The personality and vision of the American statesman, Elihu Root, who became chairman of the American delegation tomorrow with international jurists to frame a protocol defining conditions of American adherence to the World Court of Justice, are attracting as much attention as his mission itself.

Mr. Root may be said to have conquered Geneva and all luminaries of international political life who conferred with him during the recent session of the Council of the League of Nations.

His lofty moral sense is representative of the best Americanism, north or south, which brings us all confidence.

TASK GROWS LARGER. The original task of Mr. Root was to co-operate with the other jurists to revise the statutes of the World Court, but their mandate was enlarged by the Council yesterday to include the entire question of American adherence with the power to liquidate the complicated problem of American rights in connection with advisory opinions of the court.

The business of revision before Mr. Root and his fellow-jurists, experts from other countries is a study of the World Court statutes to determine whether they have become antiquated and to propose like other international institutions, they have need of being brought into harmony with modern times and modern necessities.

The best guess hazarded tonight was that little modification was necessary.

QUESTIONS ARISING. There is, however, the question of increasing the number of judges of the court, the question of their salary and the question of the conditions under which they shall serve. There is also the question of the period of their residence. The work of the court is increasing because states are submitting to it an increasing large number of cases which involve international law.

The "World Court," the real name of which is "The Permanent Court of International Justice," was the League of Nations, born of the great war. Recently the court was described as "a kind of synthesis of ancient and modern times and of the old and the new."

It also has been styled a powerful instrument of peace and good will between nations, capable of bringing together parts of mankind, which are otherwise apt to drift apart. It is, therefore, regarded as an institution which naturally appeals to American ideals.

The present court is composed of fifteen judges, eleven ordinary and four deputies. Charles E. Hughes, former Secretary of State, was elected last September as a permanent justice to fill the unexpired term of Judge John Bassett Moore, also an American, who resigned. Mr. Hughes is expected soon to make his first appearance on the bench of the court, and like Mr. Root, interest himself in the possibility of arranging for American membership.

RIGHTS TO EMPLOY. Whether or not the United States adheres to the court the government at Washington possesses the inalienable right to submit cases to the jurisdiction of the tribunal. Two groups of states are entitled to appear before the court. The first comprises the members of the League of Nations and the states mentioned in the League covenant, of which the United States is one.

The second group includes those states which took no part in the preparation of the peace of 1918 and which also were not enumerated in the peace treaties as being invited to become members of the League of Nations.

These states also may appear before the court but on the condition of specifically declaring that they accept as binding the judgment to be given in the suits submitted.

Many states have signed what is called the compulsory arbitration clause of the court by which certain disputes of a juridical nature are submitted and the signatory states agree to accept without demur the court's decision.

COMPLUSION GAINS. This compulsory jurisdiction of the court is rapidly increasing in volume. It arises either under convention concluded between two states or under general treaties signed by many states. The difficulty in the way of American adherence to the court was based on the fifth reservation. The court can give no advisory opinions without the consent of the United States on matters in which the United States "has or claims an interest."

It is the present custom of the Council of the League of Nations to ask the court for advisory opinions in connection with disputes between nations. Usually the Council insists on unanimity when asking these opinions and presumably this custom of insisting upon unanimity among the members will be continued.

POINT AT ISSUE. If unanimity is adhered to, the United States, by being temporarily represented on the Council, could exercise its veto right of veto. Evidently if a simple majority vote sufficed an American veto might be inoperative.

By the formula he has submitted Mr. Root steers away from the question of unanimity or majority by devising a system of consultation of individual cases as they arise. He is convinced that the United States and the League can reach accord in virtually every instance on the basic question of whether the United States really possesses an interest and whether an American objection to the advisory opinion requested should be sustained.

# PICKPOCKET USES FAINT AS FEINT

Novelist Robbed of Pocketbook When He Aligned Man who Faked Collapse

LONDON, March 10. (Exchange)—The latest feat of pickpockets is the faint.

A well-known writer was visiting his barber the other day and saw a man in a chair suddenly collapse while the attendant was out of the room. The novelist rushed to his assistance and hurriedly loosened his collar.

The man recovered and was advised to go home, which, with many apologies, he did. It was not until the novelist came to pay his bill that he discovered that his note case and his cigarette case had gone.

# Rush Season in New York Comes at Tax Harvest

NEW YORK, March 10. (AP)—The first two weeks in March have become to many New Yorkers a busy season second not even to the Christmas shopping rush. The reason, of course, is the income tax.

The taking of inventories and the reckoning of annual profits and losses once were routine in business and financial houses for the last week in December. Now that all this must be done with an eye to income-tax statements the tendency is more and more to postpone it toward March 15.

Thousands of office workers not directly concerned with income-tax computations are kept at their desks extra hours prior to mid-March, and windows of Manhattan skyscrapers which generally are dark by dusk are aglow until all hours.

In the theaters, where lack of leisure or funds is quickly mirrored at the "box-office windows," the attendance now falls off more sharply in the first fortnight of March than in the two weeks before December 15. As first producers thought that this was because so many players had to save enough on theater tickets to pay their income tax. Now they have decided that an even bigger reason for the decline in patronage is the night work imposed on clerks and white-collar workers at this season.

# POLITICAL WEB FOILS EXPERTS

French Policy Complicates Reparation

Negotiations Threaten to Disintegrate

Payment Proposals Far From Reconciled

PARIS, March 10. (AP)—The discussion of the experts' committee on reparations enters today upon a crucial week in the long, drawn-out negotiations. Injection of the political element into what has been more or less exclusively financial discussion is coming before the French Parliament on Thursday.

Premier Poincare was reported to have decided to leave President Moreau of the Bank of France under no misapprehensions as to what is the policy of the government of France. On the other hand, Finance Minister Cheron has a similar speech to deliver which mentions occupation of the left bank of the Rhine as an operation that might be dispensed with. The Premier was said to be insistent upon guarantees for fulfilling German obligations.

# TINGE OF DOUBT

Dispatches from Berlin today revealed the possibility, already suspected, that the work of the experts' committee may disintegrate into nothingness because of fundamental disagreement between the German delegates on one hand and the Allied and associate experts on the other.

The atmosphere held a tinge of doubt that the German viewpoint on annuities and transfers could ever be reconciled with what France has announced as her intended demands. It would appear that Dr. Hjalmar Schacht has nothing to add to his original offer of 1,500,000,000 gold marks payable during thirty-seven years, while the Allies and associate counter proposition is for 3,000,000,000 marks over a period of sixty-two years.

# WIDE DIFFERENCE

The visit of Dr. Schacht to Germany over the week-end, while ostensibly to attend the wedding of a nephew, was regarded as significant from the possibility of determining the final attitude of the German experts, on which rests the success or failure of the conference. Despite the "cordial atmosphere" which official spokesmen declare covers the situation, it is a matter of fact that there is a difference of a billion marks annually between the proposals of the Germans and of the Allies.

# MOORE WRITING LAST BOOK

Aged British Novelist Shocked by Modern Youth

LONDON, March 10. (Exchange)—George Moore, the famous novelist who recently passed his seventy-seventh birthday in "remembering," is now rewriting what he says will be his last book, "Aphrodite in Aulis."

He began it last year and it was almost finished when he was shocked by the modern youth. He now hopes to finish it in three months, after which he will live in France.

The book concerns a young Athenian who lived in the days of Pericles and the only portrait in it drawn from personal knowledge is that of a wolf. Mr. Moore once owned a wolf which he says was more devoted than any dog or cat. One day when the wolf was about half-grown he was taken to the

# RAILROAD LINK AIM EXPLAINED

Western Pacific Line Issues Statement on Project

San Francisco, March 10. (AP)—The Western Pacific Railroad Company issued a statement containing points on which it will base its position to join with the Great Northern in the building of a 300-mile gap of track between the northern Oregon terminus of the Great Northern at Klamath Falls and the main line of the Western Pacific at Patton or Kedzie, Cal.

The proposed linking up of the two lines would result in a 300-mile gap of track between the northern Oregon terminus of the Great Northern at Klamath Falls and the main line of the Western Pacific at Patton or Kedzie, Cal.

The statement reads: "The proposed linking up of the two lines would result in a 300-mile gap of track between the northern Oregon terminus of the Great Northern at Klamath Falls and the main line of the Western Pacific at Patton or Kedzie, Cal.

The statement reads: "The proposed linking up of the two lines would result in a 300-mile gap of track between the northern Oregon terminus of the Great Northern at Klamath Falls and the main line of the Western Pacific at Patton or Kedzie, Cal.

## Press Trip to Mexico Delayed by Association

**SAN FRANCISCO, Mich.** 10 (Exclusive).—The Mexican trip of the California Press Association has been postponed indefinitely. It was announced today by Friend W. Richardson, former Governor of California and president of the association.

The executive committee of the association last Saturday decided on the advisability of postponing the trip for Mexico Wednesday as planned and decided it would not be wise to try to make it on Saturday, said Richardson. "A good many members of the association were anxious to go," he said, "but they got a glimpse of Mexico in revolution. But we learned trains are not running and the elements of the tropics have priority over our service."

Reservations had been made by a party of 150 California publishers and their families for an eighteen-day trip that would have taken them to Mexico City. The resignation of the executive committee Saturday no reservations had been

## Coroner Asserts Surgeons Drunk While Operating

**MEMPHIS (Tenn.)** March 10. (AP)—Dr. W. H. Longmire and Dr. Murrel Finson, under bond on charges of murder, today reiterated that they had no statement to make "until the proper time" about the death of 12-year-old Elbert Grinstead, who was shot here, only a matter of days after an operation.

Coroner Ferguson announces he has evidence that an operation for appendicitis was performed on the boy by the two physicians and that they were intoxicated at the time. The coronal office of the Coroner's office charges the doctors with criminal negligence and intoxication. The two accused physicians will be arraigned Tuesday.

## DOCTOR SENDS NEW TRUSS ON TRIAL

**Money Down Required; No Cash Deposit; No C.O.D.**

**Kansas City, Mo. (Special)**—Havling invented a rupture appliance with no leg straps, no elastic belt and no padding. It is a simple, easy wearing, comfortable, and absorbing pad, an unusual offer is now being made by the Hemia Spina Support Co., 2201 Broadway, Kansas City, Mo. Without a cent in advance, no cash deposit, no C.O.D., will carry the Hemia Spina Support trial. Hundreds of people have with double rupture of long standing backache, sciatica, rheumatism, quick improvement and freedom from the hampering and discomfort of the rupture. The appliance is ruptured, and wanting quick relief and improvement, make this the opportunity of a lifetime. The trial offered after the 30 days' trial pay its full price and keep the appliance. No return, no refund, it is and will be yours. Accept this offer, today.—(Advertisement.)

## “—SO COOLIDGE SAID TO ME”

### Messenger Boy Tells of Visit to Home of Former President in Northampton

[The first Northampton resident to enjoy the hospitality of ex-President and Mrs. Coolidge on March 5—the day they returned home—was not a politician or a friend of the old days. The honor fell to Alfred D. Laroche, a local newspaperman. A Telegram messenger, son of a Northampton carpenter, in the following article Alfred tells just how he came to enjoy the distinction.]

BY ALFRED D. LAROCHELLE

(Copyright, 1929, in all countries by North American Newspaper Alliance.)

NORTHAMPTON (Mass.) March 10. (Exclusive)—The office gave me two copies of telegrams to deliver on March 5 and I looked them over and found one addressed to the Coolidges at 31, Massachusetts street. Sometimes I'm not sure just where an address is, but I know this one address I knew. I guess there is nobody in the country who doesn't know it.

I got on my bicycle and went up to the Coolidges' house at 31 Massachusetts street in the rain. I left the wheel at the curb and went to the door and rang the bell. I knew the Coolidges had a housekeeper, so I expected her to open the door. She opened and I looked up—and it was Mrs. Coolidge herself! I had never seen her before, but I knew her the minute I saw her. "Come in," said Mrs. Coolidge. I wiped my feet on the mat and went in. She handed me a telegram and the book and asked her just where to sign. She took my pencil and wrote "G. Coolidge."

"Thanks," I said. But she smiled at me and asked for my name. I told her that. Then she asked where I lived. I told her that, too.

"Now," she said, "won't you stop a minute and have something to eat?"

"Well, I don't know," I said. I'm a kind of red. "I got to get back to the office and see it's after 1 o'clock."

"I didn't tell her, but I just had had dinner before I started for the newspaper house. That wouldn't have helped."

"But surely," she said to me, "you stop just two or three minutes and have a glass of milk and some cake." She smiled again.

Well, it was raining hard, and the smell of fried food. I could smell it from the hall. I guess the Coolidges had just had their dinner, too.

"Thanks," I said. "I guess so, for a minute."

I forgot to talk about the dogs. They were playing around the hall all the time—two of them; the long-haired, brown one—the chow—"Toby" and the other one, the one that's always been called "Beans." The dogs kind of ran at me when we went into the dining-room and I didn't look around.

"Why didn't we see anybody else in the room. But I saw her I saw him, sitting over at the other side, reading a newspaper—President Coolidge, I mean."

He bowed his head and looked at me.

"What's your name?" he asked me. I told him.

"How are you?" he said.

"I don't know what I told him. I guess I answered all right, because he didn't frown. I guess he lives here."

I told him, "down in Walnut street."

That's all he asked. He began reading again.

Mrs. Coolidge came back from the kitchen with a pitcher of coffee and a big piece of chocolate cake with frosting on it. She put it on the table and told me to sit down, and she sat down near me. She didn't say much while I was eating, just a kind of smile. When I got all through, I thanked her and she held the chair for me.

I went along then. I don't believe I made any mistakes that afternoon, but I might have. I was kind of dazed. I guess I was.

Mrs. Coolidge is all right. I never met her before, but I'll say she's all right.

**COURT PUTS BAN ON "BELLACHES"**  
**Jury Who Applied It to Lawyer Ordered From Room by Trial Judge**  
...  
**SAN FRANCISCO, March 10.** (Exclusive)—That good old-fashioned word, "bellach," frowned upon in polite discourse, came under the ban in the court of Superior Judge Dean Arthur Bird, a juror, interrupted the proceedings by asking Attorney Heron, representing one of the litigants, to face the jury. When the attorney said he knew of no law which required that action, Bird remarked: "We're all tired of hearing you bellache, anyway." Bird Mr. Bird.

# Youthful Kite Flyers in Remarkable Performances at Sawtelle Meet

Remarkable Exhibition of Kite Flying Was Given by More Than 100 Boys and Girls at Sawtelle Saturday during Kite Day contests held under the auspices of the playground department. One youth flew his own model a distance of a mile while another gained an altitude of 1000 feet. A feature of the exhibit was the kite battles in which diversified models armed with safety-razor blades strove for supremacy in the air. One kite was cut to ribbons and three others were brought down when their lines were cut. Left above, Harold Swalley with "defeated" kite; middle, Norman Granger shows box model, and right, Rex Brown with diving model, one of victors in air battle. (Times photos.)

Sensible Dress Modes of women will ultimately make the weaker sex the stronger, Dr. Leonard Hill of the University of London, emphatically declares. (P. & A. photo.)

The Female of the Species Gains in Prestige among the Indian tribes of North America. The dignified female presented above is the most powerful of the medicine makers of the tribes of Waterton Lakes National Park Reservation in the Canadian Rockies. (A. P. photo.)

Commander Byrd's Wild Neighbors in the Antarctic are a Scrappy Lot These Two Unusual Photographs Indicate—In the photo at left a pair of penguins are advancing to the attack as a seagull seizes one of their precious eggs. The gull is a heartless robber and he has a taste for penguin eggs. An unguarded nest is certain to bring him foraging. On the right two bull seals are battling for the regard of the cow seal in the background. Successful love making among seals depends largely upon physical prowess and the "best man" always boasts the largest harem. (Herbert photos.)

Probably the World's First Bakery is the collection of ovens shown in the above photo and recently unearthed by the Field Museum-Oxford University expedition in Mesopotamia. The find was made on the site of the ancient city of Jemdet Nasr. (P. & A. photo.)

He Doesn't Have to Carry Matches—Jack Gall, Cincinnati (O.) Boy Scout started a fire by primitive friction method in six seconds, thereby clipping two-fifths of a second from world's record, during a recent track-and-field carnival in Ohio city. (A. P. photo.)

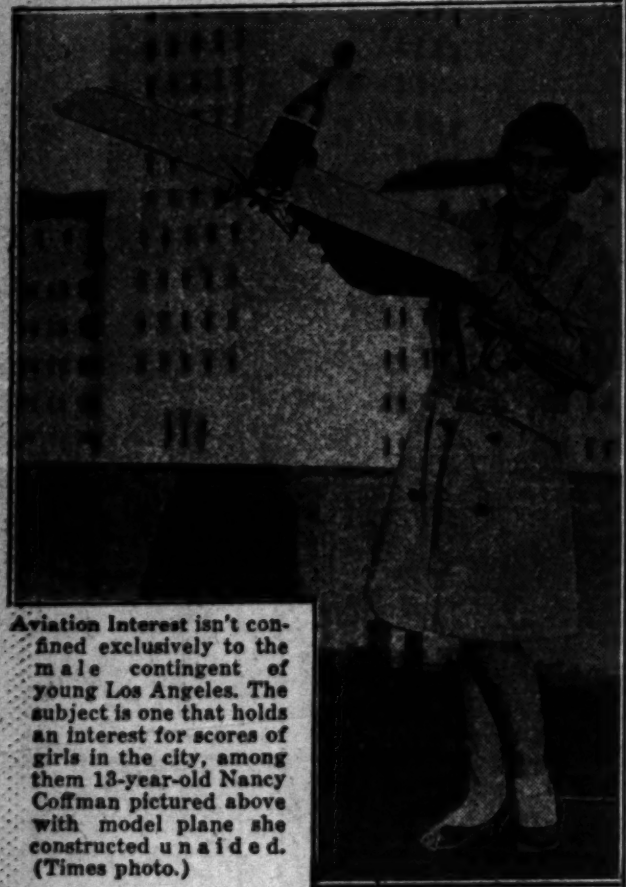

Who Wouldn't Go into Training Early for a cake-eating contest if the proper training material were provided. June Blossom is the blond cake-eater above and she's getting in shape for the annual contest at the forthcoming Food and Household Show.

Alpine Chasseurs of France furnished May McAvoy with the idea for the chasseur costume she displays above. Jaunty cap is characteristic of French organization.

What Are the Wild Waves Saying, Sister?—Regardless of what they may be saying they are highly inspirational, according to Wesley Buggles, film director, who asserts he works out most of the problems that confront him on the beach. (Times photo.)

Aviation Interest isn't confined exclusively to the male contingent of young Los Angeles. The subject is one that holds an interest for scores of girls in the city, among them 13-year-old Nancy Coffman pictured above with model plane she constructed unaided. (Times photo.)

## HIGH LIGHTS IN HISTORY 1285

THE DEVELOPMENT OF TRENCH FIGHTING GREATLY CHANGED THE PHYSICAL ASPECT OF WAR. GONE WERE THE BRIGHT UNIFORMS, THE BEATING DRUMS AND FLUTTERING FLAGS. A MODERN BATTLEFIELD PRESENTED A STRANGELY DESERTED APPEARANCE, THOUGH THOUSANDS OF MEN OCCUPIED THE SCARCELY VISIBLE TRENCHES CLOSE AT HAND. A FEW SKULKING MEN AND AN AIRPLANE DROWNING HIGH OVERHEAD MIGHT BE THE ONLY SIGNS OF LIFE.

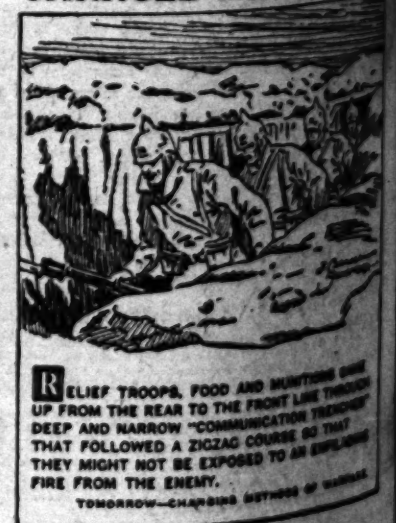

BETWEEN THE OPPOSING LINES LAY "NO MAN'S LAND", A DESOLATE, SHELL-SWEPT WASTE—PITTED AND FURROWED WITH SHELL-HOLES, STREWN WITH SHATTERED TREES, DEMOLISHED BUILDINGS AND BODIES OF MEN—MUTE, CRIM EVIDENCE OF THE HAVOC WROUGHT BY WAR.

## The Story of the World War 55—The Modern Battlefield.

HEAVY ARTILLERYMEN IN EMPLACEMENTS FAR BEHIND THE FRONT LINE HURLED SHELLS AT TARGETS THEY SELDOM OR NEVER SAW, THEIR FIRE DIRECTED BY FIELD TELEPHONE FROM OBSERVATION POSTS THAT COMMANDED A VIEW OF THE ENEMY.

RELIEF TROOPS, FOOD AND MUNITIONS CAME UP FROM THE REAR TO THE FRONT LINE THROUGH DEEP AND NARROW "COMMUNICATION TRENCHES" THAT FOLLOWED A ZIGZAG COURSE SO THAT THEY MIGHT NOT BE EXPOSED TO AN ENEMY'S FIRE FROM THE ENEMY.

Expected Profits Cut in Half  
by Their Move  
They Will Guarantee Jack  
at Least \$30,000

BY JACK FARRELL  
NEW YORK, March 10. (Exclusive)—When Jack Dempsey and William J. Fugazy, promoter of boxing at Edw. P. 1014, Brooklyn, confer tomorrow night, a former heavyweight champion will cast his lot with Fugazy and the latter's partner, Ed Cole, in the prime time of the game. On good authority it was learned today that the Fugazy outfit has offered Dempsey a partnership on a percentage basis that he has been asked to accept. Dempsey has not been guaranteed by Jack, of course, but Fugazy will guarantee Dempsey as much as the Madison Square Garden paid the late Tex. \$30,000 a year. Dempsey has a date to confer on Wednesday with William J. Fugazy, owner of the Garden Corporation. Jack has made it fairly plain he will not join the new organization as Rickard's partner. It was reported, however, by a row over the rights of the Striking-Sherkey fight by Dempsey at \$50,000 more than heaved by the latter charge for rent of the track on which the arena was built and other items. The ex-champion did demand to be charged against Dempsey's share of the show. Dempsey's contract will be held by the office of Dempsey's attorney, Arthur M. Driscoll.

### DAVE MARTIN ANNEXES SAN GABRIEL INVITATIONAL

CALIFORNIAN  
WINS, 4 AND 3

Defeats Winston Fuller in  
Brilliant Match

Dr. Manhart Trims Lawson  
to Cop Second Flight

Beckwith Takes Measure of  
Derwin, 3 and 2

BY EDWARD LAWRENCE  
Wet, perhaps, but far from water  
logged, young David Martin of the  
California Country Club yesterday

afternoon won the San Gabriel  
Invitational tournament from  
Winston Fuller of the Los Angeles  
Country Club, 4 up and 1 to play on  
the thirty-third green.

Battling over a course which was  
rain soaked during the morning  
round and wind swept in the after-  
noon, both Fuller and Martin  
played remarkably consistent golf.  
They rounded the 18-hole mark  
all even, Fuller having a medal of  
77 and Martin a 78.

Martin clinched the match  
early in the afternoon round,  
when he won the twenty-second,  
twenty-third, and twenty-fourth  
holes with few blunders and a par  
for five. Fuller won the twenty-  
fifth hole with a par 4, but  
Martin won the twenty-sixth hole  
with a par 3, and the twenty-seventh  
hole mark 3 down to his California  
opponent.

Fuller's last chance of winning  
went glimmering on the thirtieth.  
Still 3 down, Fuller was forced to  
putt for a par 5.

DAVE MARTIN.

Sea Ghosts Battle at Harbor

#### NICK CARTER GETS BUSY AS REPORT COMES IN OF NURMI REINSTATEMENT BY A.A.U.

With the announcement from  
New York Saturday that Paavo  
Nurmi has been reinstated by that  
body, the A.A.U., Nick Carter,  
star local miler, redoubled his  
training campaign in preparation  
for his meeting here with the  
Phantom Finn one week from Sat-  
urday.

Nick worked out twice yester-  
day, once in the morning out of  
doors and again in the afternoon  
at the Los Angeles Athletic Club.  
Hugh Finney, I.A.A.C. public-  
ity man, stated that Nick ran  
the mile in 4m. 22s. at a trot  
and over the eleven-lap indoor  
track.

Carter, it will be remembered,  
gained international fame by trim-  
ming Edwin Wide, Swedish school-  
master, in a mile race here two  
years ago next May. His time was  
4m. 16 1/2-ss., a new Pacific Coast  
record.

NEW YORK, March 10. (AP)—  
Paavo Nurmi, Finland's phantom  
of the tracks, is back again in the  
official fold of the Amateur Athletic  
Union. After being barred from  
running for two weeks because of  
his failure to appear at the na-  
tional championship meet February  
23, he was reinstated to good stand-  
ing.

#### BABE SAILS TO YACHT VICTORY

Owen Churchill's Boat Leads  
Eight-Meter Class

Marin Takes Second Prize in  
Heavy Weather Tilt

Pirate in R Class Triumph  
But Race is Protested

BY FRANK ROCHER  
LOS ANGELES HARBOR, March  
10.—Sailing in the tail-end of a  
southeast gale which kicked up a  
stiff blow that averaged twenty-  
five miles an hour for the greater  
part of the afternoon, three  
locally owned boats best cham-  
pion, won the B-class honors with  
the day's honors. The Marin, sail-  
ed by Ralph Ellis, the winner of  
the opening race in the eight-  
meter class, took second money with  
the Monidab, third.

The Pirate, owned by O. K.  
Hunsaker, and skippered by  
Walt Hubbard, Jr., who is the  
international star boat cham-  
pion, won the B-class honors  
with the Maribel second, and the  
Alert IV, third. The Pirate, rep-  
resenting the California Yacht  
Club, proved to be a decidedly

#### SCHMELING TO MEET PAULINO

Next Big Heavyweight Bout  
Planned for June 27

German Star and Basque to  
Mix at Yank Stadium

Max's Many Managers Only  
Hit to Proposed Go

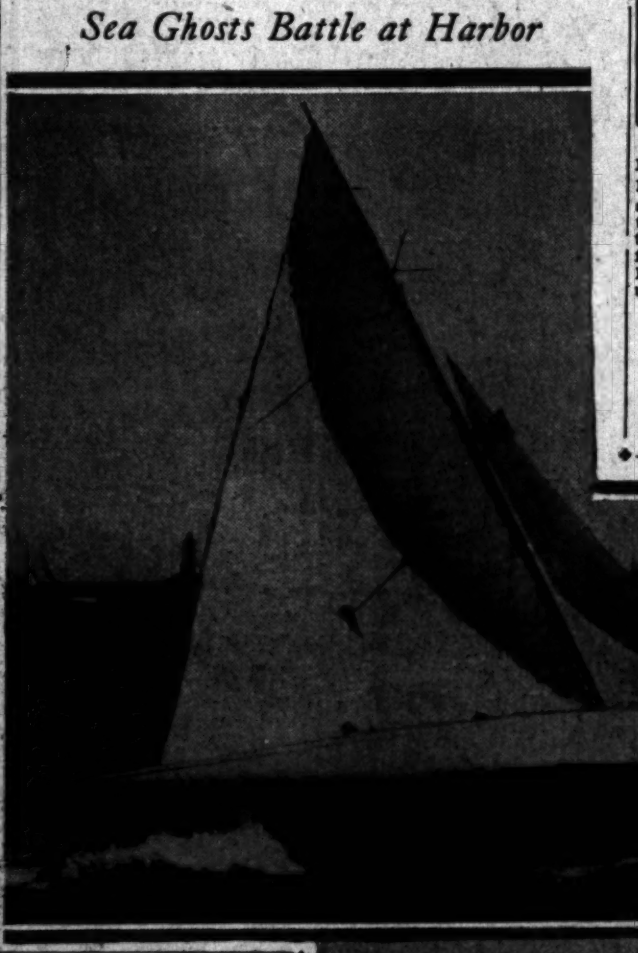

NEW YORK, March 10. (AP)—If  
all goes well, the next big heavy-  
weight battle will take place in the  
Yankee Stadium on June 27 with  
Max Schmeling of Germany in  
one corner and Paulino Uzcudun,  
Spanish woodchopper, in the other.  
Tom McCardie, matchmaker at  
Madison Square Garden, an-  
nounced tentative plans for the  
fight today. No contracts have been  
signed yet, but the fight is con-  
sidered a foregone conclusion.

Garden definitely committed itself  
to the bout. The directing heads  
of the corporation may attend to  
that at a meeting scheduled for  
tomorrow.

There is a big question of  
whether Schmeling can clear  
himself of a plethora of man-  
agers in time to go through the  
match. Herr Max, whose  
stock took a remarkable jump  
when he stopped Johnny Heise,  
new to the Garden, is con-  
vinced that he has too many  
managers for his own good and  
he plans to cut down the num-  
ber in some way even if it  
means little ill-will for a year  
or so.

However, if Schmeling signs, there  
seems to be little doubt that the  
fight will be a success.

(Continued on page 11, Col. 5)

#### BRUINS TACKLE BRONCOS TODAY

Baseball Teams to Meet at  
Moore Field

The baseball team of the Uni-  
versity of California at Los Angeles  
will inaugurate its diamond season  
in the Pacific Coast Confer-  
ence this afternoon when it  
encounters the Bronco base-  
ballers from Santa Clara in the  
first of a two-game series to  
be played at Moore Field. Due to  
the fact that the Bruin nine  
has not yet played against a  
stellar college team this  
year, it will be something of a dark  
horse until this afternoon, and Santa  
Clara has been given a slight ad-  
vantage in the pre-game odds.

Santa Clara played a two-  
game series with the University  
of Southern California baseball  
team last Friday and Saturday,  
dropping the first encounter to  
the Trojans by a 5-4-3 count.  
The second game was stopped in  
the fifth inning by rain when  
the Bronco were enjoying a 3-1-1 lead. However, it  
is not probable that inclement  
weather will stop today's dis-  
cussion on Moore Field.

The Bruins are credited with  
having the best material in years,  
but they have not yet been tested  
in serious battle. Their games so  
far have been with local, commer-  
cial nine, and the U.C.L.A. team  
has a number of victories on their  
belt, including several over the Santa  
Monica Baseball College. The  
Vermont-avenue horseholders also  
played the Los Angeles Fire De-  
partment team to a 3-1-3 tie one  
day last week.

Batteries for today's game will  
probably be as follows: U.C.L.A.—  
Capt. "Whitney" Graham on the  
mound, and Stahl behind the bat;  
Santa Clara—Cassano, pitcher, and  
Art, catcher. The second game of  
the series will be played tomorrow  
afternoon on the same field.

**SEATTLE BUYS WALLY HOOD**  
\*\*\*\*\*

Popular Angel Outfielder Goes to Indians; Cubs  
Resume Seraph Series Here Next Friday

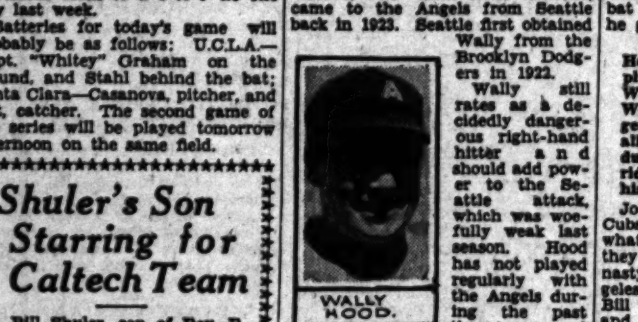

BY BOB RAY  
Wally Hood, popular Angel outfielder whose mighty bluegeon has  
won many games for Los Angeles during the past five seasons, has  
been sold to the Seattle Indians. It was announced yesterday by Oscar  
Reichow, Seraph business manager. The deal was a strictly cash  
affair and the purchase price was not announced.

Hood, who hails from Whittier, is pretty much of a cinch to  
come to the Angels from Seattle (bat 200 for Seattle this year once  
he gets to playing regularly again).

The Angels parted with Hood because they have a sur-  
plus of good fly-chasers. With Jigger State, Earl Webb,  
Wes Schulmerich, Walter Berger, Jim Moffitt and Leo Burns  
all available for Angel outfield duty, Marty Krug had to get  
rid of Hood to make room for his promising youngsters.

Joe McCarthy and his Chicago Cubs, mulling over the threat as to  
what they'll do to the Angels when they meet again and also his-  
sing nasty remarks about the Los Angeles weather, will board one of  
Bill Wrigley's boats this morning and go back to their Catalina Is-  
land training camp. The Cubs and  
consequently his batting average  
did not benefit by the inactivity.

#### TENNIS PROS TO MIX AT MIDWICK

The first annual Pacific Coast  
professional tennis tournament will  
be staged at the Midwick Country  
Club starting the 29th inst., accord-  
ing to the announcement of the  
club officials in charge of the event.  
The Midwick organization is put-  
ting up a purse of \$1000 for the  
winners.

The events to be staged are  
singles and doubles. The tour-  
nament is open to all in the  
State and along the Pacific  
Coast. Amateurs that choose  
to enter the event will forfeit  
their amateur standing. It was  
announced by the Southland  
tennis body. The journey closes  
on the 31st inst.

Among entries already to be re-  
ceived are Harvey Snodgrass, Ber-  
villy Hills; Walter Westbrook, Mid-  
wick; Howard Kinsey, California at  
San Francisco; Bob Allen, Los An-  
geles Country Club; Norval Craig  
and Wynn Mace, Los Angeles Ten-  
nis Club; Bill Ackerman, Palomar;  
Harold Goddard, Tom Ferrandini  
and Roland Roberts, unattached.

#### RIVIERA HOLDS YEARLING TOURNAMENT ON THURSDAY

Instituting a departure from the  
usual or seasonal golf tournaments,  
the Riviera Country Club will stage  
the first "yearling tournament" on  
Thursday and Friday.

All golfers who began playing the  
game subsequent to January 1, 1928,  
and are members of a club affiliated  
with the Southern California Golf  
Association, are eligible to partici-  
pate in the tournament.

The Provident Loan Association is  
presenting two unique and beautiful  
bronze trophies to be won by the  
scores of low gross and low net.  
These trophies are now displayed  
on the third floor of the Los An-  
geles Athletic Club.

Golfers of limited experience  
are usually hesitant about enter-  
ing competitive play because  
of the expense.

## PLANS THREE RECORD HOLES

Texas Company to Duplicate Deepest Project

Will Drill Three 8525 Feet or Even Deeper

Original Well Producing at 2072-Barrel Rate

AUSTIN (Tex.) March 10. (Exclusive)—The Texas Oil & Land Company, which has been drilling the deepest oil well in the world and still getting 2072 barrels of oil a day from it, at 8525 feet, is going to drill three more wells to that depth or deeper, on the same lease.

An important consideration in going after this deep oil is that it has a gravity of 56.77 deg., as compared with a gravity of 53 deg. from shallower wells in the same field. The high-gravity oil from the world's deepest well is mixed with 3300 barrels daily of 53-deg. gravity from the company's other wells and the whole is raised to 44 deg. For this blended product the company receives the posted price of \$1.50 per barrel, which is 30 cents below what it was a short time ago.

The Signal Gasoline Company will increase the capacity of its eastinghead gasoline plant at the deep well in order to handle the rapidly increasing production of gas from the deep well, which was left standing for a long time, and is now going ahead with the drill at 5100 feet. Pipe was set at 5000 feet. The drilling is being done by the Vacaqueros formation, a sandstone mass which, it is believed, should be highly productive. If the Vacaqueros formation is not reached, the company will prospect ahead in the expectation of finding the Sepe formation. The expectation is that the Vacaqueros in the Storke well should be 1700 feet deeper than in the Elwood community hole.

## Deep Test of East Elwood Area Planned

A deep test of real consequence is to be made out of the Storke No. 1 of the Petroleum Securities Company, on the east side of the Elwood oil field. This project, some miles east of the Barnardville No. 1 Grande combination, the Elwood Community No. 1, has drilled out the cement plug which was left standing for a long time, and is now going ahead with the drill at 5100 feet. Pipe was set at 5000 feet. The drilling is being done by the Vacaqueros formation, a sandstone mass which, it is believed, should be highly productive. If the Vacaqueros formation is not reached, the company will prospect ahead in the expectation of finding the Sepe formation. The expectation is that the Vacaqueros in the Storke well should be 1700 feet deeper than in the Elwood community hole.

## STATE HOLDS REFINING LEAD

Survey Shows Capacity of California Plants for Handling Crude Oil 855,150 Barrels Daily

California continues to lead all other States in the capacity of its operating refineries to handle crude oil, according to the Oil and Gas Journal's 1928 survey of petroleum refining in the United States. This survey, which is one of the features of the Journal's annual refinery number shows that forty-five operating refineries in California have a rated crude oil capacity of 855,150 barrels daily. This capacity is approximately 50,000 barrels daily in excess of the total refinable and nonrefinable crude oil in California at this time.

According to the survey, twelve refineries in California have cracking facilities to obtain gasoline and other light and products from fuel oil and gas oil. The daily capacity of these cracking units is 117,000 barrels.

For the entire United States on the last day, 235 refineries were either operating or under construction, nine plants being listed as under construction. The 335 refineries have a crude oil capacity of 3,477,250 barrels daily, or approximately 700,000 barrels more than the combined domestic crude oil production plus imports. A year ago there were 315 refineries operating or under construction with a rated capacity of 3,114,880 barrels daily.

Due to the starting up of plants and the fact that a few have been dismantled during the past year the number of shut-down plants has decreased from 148 to 133 with a rated crude oil capacity of 264,300 barrels daily. Most of the refineries listed as shut down are small skimming plants which have been not operating for two or more years.

In cracking facilities 169 refineries now have one or more units with a combined capacity of 1,444,100 barrels daily. A year ago 148 refineries had cracking facilities with a capacity of 1,237,384 barrels daily.

In addition to the large number of new refineries and the expansion of existing facilities, the consolidation of refinery organizations during the past year was outstanding. The purchase of the Beacon Oil Company by the Standard Oil Company of New Jersey, the Texas Company's merger of the California Petroleum Corporation properties and the purchase of the New England Oil Refining Company by the Shell United Oil Company are some of the consolidations mentioned.

## 'GAS' LOSES FIRST RANK IN EXPORTS

Fuel Oil Takes Lead in Week's Shipments; While Total Declines Slightly

Totalling about 150,000 barrels less than the shipments of the previous week, bulk petroleum exports from Los Angeles Harbor last week reached 2,046,801 barrels, with fuel oil taking the lead by a total of 866,113 barrels, while gasoline was second with 678,114 barrels and crude was third with 423,439 barrels.

The Pacific Coast domestic trade took 260,214 barrels, including 369,000 barrels of crude, 267,150 barrels of fuel, 217,019 barrels of gasoline and 32,000 barrels of Diesel. Pacific foreign trade called for 555,867 barrels, embracing 408,990 barrels of fuel, 20,274 barrels of crude and 86,603 barrels of Diesel.

The Atlantic domestic trade took 555,861 barrels, including 394,238 barrels of gasoline and 171,223 barrels of kerosene. The Atlantic foreign trade called for 74,759 barrels of gasoline. The shipments for the week were listed as follows:

PACIFIC COAST DOMESTIC  
Crude oil to San Diego with 27,500 barrels of fuel for the Standard Oil Company. In addition to the 27,500 barrels of fuel, the Standard Oil Company also shipped 10,000 barrels of gasoline to San Diego. The total shipment for the week was 37,500 barrels.

## CAMP CREEK MINES ARE ON UPGRADE

Lucky Day Mine Said to Have Opened Up Body of 40 Per Cent Copper Ore

PHOENIX, March 10. (Exclusive)—Renewed activity is seen in the Camp Creek section, about forty-five miles northeast of Phoenix. Some remarkable copper ore, practically hornblende, carrying 40 per cent of metal, is being taken from the Lucky Day mine, formerly known as the Milwaukee.

The property is under lease and owned by James Mayers of Phoenix and Otto Brummeier, a Detroit geologist who is carrying on the work of development. Several sections of the richer ore are ready for shipment, this facilitated by a good road that has been built by Maricopa county up Camp Creek Valley.

In mineralized zone that has been traced for 4000 feet, in a range of gray schist, is a vein fifteen feet wide declared to sample above 10 per cent copper. In the same section is the Red Rover property, which has been under development for several years by the Chicago Interests of Los Angeles.

Seven miles north of Buckeye, in the foothills of the White Tanks Mountains, A. J. Phillips recently uncovered a four-foot ledge that shows free gold across the face of a drift. The section is a comparatively new one in a mining way.

## ORE FIND REPORTED

Strikes in United Republic Mine Held Highest Encountered

F. L. Mullen of Los Angeles, president of the United Republic Gold Mines Company, is in receipt of a telegram from Kingman, Ariz., from the superintendent of the company's Century mine, which says: "Have struck a four-foot ledge in No. 1 drift, containing fifteen oz per ton of gold." The new ore body, Mr. Mullen says, was opened in a drift 200 feet from the main working shaft, giving 250 feet of back to the surface, and adds materially to the future productivity of the mine, the new 150-ton mill for which will soon be in regular commission.

Much interest is being taken locally in the news of this new and important find.

## NEW ENTRY IN FAMOUS FIELD

Pacific Western Announces Kettleman Hills Deal

Two Wells to Be Started in North Dome Area

Holdings Reported District's Third Largest

Announcement has just been made by W. G. McDuffie, president of the Pacific Western Oil Company, that the company has succeeded in getting into the Kettleman Hills field and will be drilling two wells there immediately.

The Pacific Western has completed a deal through which it has contracted to develop 1780 acres held by the Kettleman Oil Corporation.

Five tracts in this deal are said to be regarded by geologists as promising property, while six tracts are regarded as being well located. These holdings are said to be the third largest in the district.

The company's operations there will be watched with great interest, owing to the prominence recently gained in the oil world by the Kettleman Hills field, where a very productive well was discovered some months ago by the Milham Exploration Company, after operating for twenty-five and thirty drilling projects in the north dome area, and several in other districts of the Kettleman Hills.

The Pacific Western, which is drilling two wells on Southern Pacific right of way in the Ventura-Avenue field, on a share basis, is competing for the oil sand in the west of these, at about \$400 feet.

## Gold Strike in Property Near Round Mountain

TONOPAH (Nev.) March 10. (Exclusive)—The shaft of the Gold Hill Mining Company, working a group of claims five miles north of Round Mountain, has exposed gold ore in the main silver ore body, according to advices reaching Tonopah. The strike was made at a depth of 300 feet and is said to show ore running high in the yellow metal. Six veins have been demonstrated in the group. The company is controlled by E. A. McMurray and associates of Los Angeles.

Encouraged by ore disclosures in the Eastside, Bullion Hill and Erwin properties the Majestic Mines Corporation is considering erection of a flotation mill at its silver properties in the Cortez district. The management reports a vein rich in silver, and the company has widened from a few inches to over seven feet and that shipments to Utah smelters have begun. Values are largely in the form of silver. The group contains forty claims located near the producing mines of the Cortez Consolidated Company.

## FIGHT NEAR IN ARIZONA ON TAILINGS

Delta Company States Mill Refuse Flows Down and Halts Amalgamation

PRESCOTT (Ariz.) March 10. (Exclusive)—Something similar to the historic "slickest" dispute in California has arisen on the Hassayampa River, where A. W. Laws of the Delta Mining Company has made declaration that tailings from the Storm Cloud mill have prevented amalgamation at his mill and have killed his garden.

In the Upper Gila Valley, years ago, court orders compelled the impounding of mill tailings by the great copper companies of the Clifton-Morenci district.

According to Ellison Thacker, president of the Squaw Peak Mining Corporation, construction of a large flotation mill now is justified by ore development on the corporation's property, eight miles from Camp Verde. More recently, he has been prospecting the ground since 1916 and has done 3000 feet of exploration. Especially good values are largely in the form of silver.

Near Humboldt, in the Lohokou property, is a report of 350 feet of drifting on the 200 level on a vein that runs from six to eighteen inches wide of high-grade galena, also carrying good values in silver. In this is George P. Jacobs of Phoenix.

## Owner to Move Old Pocahontas Mill in Arizona

TUCSON (Ariz.) March 10. (Exclusive)—W. I. Johnson of this city states his expectation of moving the old Pocahontas mill from near Mayer to a point near Grand Canyon, there to work ore from the Grand Canyon property of the Northern Arizona Lead and Zinc Mining Company. The mine lies on the Hava Supai reservation, close to the scenic Grand Falls fall. The ore, running high in silver, were packed on burros from the canyon by pioneer miners.

The formation's novelty is that the horizontal veins are found in part under a soft spar with extremely low transparent crystals. The early miners reached their workings by means of notched cottonwood logs, placed against the cliffs.

## LYNX CREEK DAM TO BE ELEVATED

New Tonopah Company to Add Fifteen Feet During Coming Summer

The New Tonopah Dividend Mining Company, operating the Lynx Creek gold placer diggings twelve miles from that place, upon the recommendation of company engineers, has decided to increase the height of its dam, constructed for water storage purposes, an additional fifteen feet.

When the dam was originally constructed, according to President L. V. Riddies, plans were formulated for the addition which, when completed, as contemplated, will add about 500 acre feet to its storage capacity.

With more than 9,000,000 cubic yards of gold-bearing gravel available and workable, Riddies states, it is the intention of the company to increase the capacity of its gold-recovery plant as quickly as possible and with this in view, and also to add to the storage capacity of the dam, the directors of the company have levied an assessment of 1-3-cent a share on its outstanding capital stock. The new work is to be completed during the coming summer.

## OIL GROUPS ROAD BUILDERS' VENTURA FIELD SPREADING

Total of 125 Miles Constructed by Various California Companies During Last Three Years

That California oil companies have provided the State with more than 125 miles of serviceable highway, including roads built during the past three years and those now under construction, is the interesting fact that has just been revealed by the bureau of public information of the Chamber of Mines and Oil.

Pointing out that the oil operators have spent hundreds of thousands of dollars during the last thirty months in the construction of highways where previously there were no passable roads, the chamber's bureau adds that long strips of road, built either independently by the oil companies, or by county work gangs with materials supplied by the oil companies, and were taken over as county roads and are being maintained as such.

In other instances the oil companies have built roads, to permit the public to enjoy the use of them. Most of these roads have been constructed in Kern and Kings counties, and were made necessary by the discovery of new oil fields, coupled with the fact that the companies had not yet provided highways in those districts.

## GOLD MINE OFFICERS SELECTED

United Republic Holds Meeting and Inspection Made of Property

Holding its annual stockholders' meeting at Kingman, Ariz., recently the United Republic Gold Mines Company elected directors for the ensuing year as follows, the official roster being chosen at a meeting of the new board in this city the 5th inst.:

F. L. Mullen, president and treasurer; Paul Weindorf, vice-president; S. M. Fisher, secretary; W. A. Ryeman, J. B. Peyton, T. J. Kallins and A. W. Johnston.

A large number of stockholders were present at the Kingman meeting after making a visit of inspection to the company's Century mine and mill, the latter being about ready to go into regular commission in the treatment of about 100,000 tons of available ore averaging approximately 35 per cent in its lead, silver, gold and copper content.

The mill is of the selective-oil flotation type, of 150-ton daily capacity. According to milling tests already made, President Mullen states, a recovery of 85 per cent of the assay value of the mill heads is anticipated. With the new mill in successful operation, it is stated, the management plans to resume operations at the company's partially developed gold mine near Oatman. The company is said to be sound financially.

Holding its annual stockholders' meeting at Kingman, Ariz., recently the United Republic Gold Mines Company elected directors for the ensuing year as follows, the official roster being chosen at a meeting of the new board in this city the 5th inst.:

F. L. Mullen, president and treasurer; Paul Weindorf, vice-president; S. M. Fisher, secretary; W. A. Ryeman, J. B. Peyton, T. J. Kallins and A. W. Johnston.

A large number of stockholders were present at the Kingman meeting after making a visit of inspection to the company's Century mine and mill, the latter being about ready to go into regular commission in the treatment of about 100,000 tons of available ore averaging approximately 35 per cent in its lead, silver, gold and copper content.

The mill is of the selective-oil flotation type, of 150-ton daily capacity. According to milling tests already made, President Mullen states, a recovery of 85 per cent of the assay value of the mill heads is anticipated. With the new mill in successful operation

# VENTURA FIELD SPREADING OUT

New Discoveries Sought in Four Directions  
Two Companies at Work on North Flank  
Road Work Finished on Sexton Lease

Efforts are at this time being made to extend the producing area of the Ventura-south oil field in four directions. Two companies are endeavoring to discover additional new oil on the north flank. The Petroleum Securities Company is drilling 1500 feet in its Taylor No. 1, north and west from the old Ventura field. The Ventura-south oil field is being extended in four directions. Two companies are endeavoring to discover additional new oil on the north flank. The Petroleum Securities Company is drilling 1500 feet in its Taylor No. 1, north and west from the old Ventura field.

Far over to the east of the producing area of the field the Petroleum Securities Company is drilling 1500 feet in its Taylor No. 1, north and west from the old Ventura field. The Ventura-south oil field is being extended in four directions. Two companies are endeavoring to discover additional new oil on the north flank. The Petroleum Securities Company is drilling 1500 feet in its Taylor No. 1, north and west from the old Ventura field.

On the extreme south dip of the field the Associated Oil Company is reported as being driven into the Ventura-south oil field. The Ventura-south oil field is being extended in four directions. Two companies are endeavoring to discover additional new oil on the north flank. The Petroleum Securities Company is drilling 1500 feet in its Taylor No. 1, north and west from the old Ventura field.

# Reports on Oil and Ore in the Great Southwest

## TONOPAH MINES GROUP REVIVES

Nevada Property Prospects Reported Brighter

Pay Ore in Sight Declared Best in Three Years

Monthly Production Placed at About 6000 Tons

TONOPAH (Nev.) March 10. (Exclusive)—After producing steadily for approximately twenty-five years and disbursing numerous dividends, the Tonopah Mining group at Tonopah is officially stated to be showing more commercial ore than at any time in the last three years. Production is averaging 6000 tons monthly, with a large tonnage of high-grade ore being shipped to the coast. The Tonopah Mining group at Tonopah is officially stated to be showing more commercial ore than at any time in the last three years. Production is averaging 6000 tons monthly, with a large tonnage of high-grade ore being shipped to the coast.

Gilbert mine owners report that \$25,000 has been raised for the erection of a custom mill in that camp, and that preliminary work will soon begin. Interest in the Gilbert field has been stimulated by the recent development of rich ore in the Blackfoot-Coverly lease on the Last Hope, and encouraging developments in other claims. The product shipped from the Last Hope is believed to be averaging around \$40 per ton.

The ore body in the Schubert-Cop gold mine at Manhattan, recently purchased for \$100,000 by the Nevada Coalition Mines Company, has been penetrated for 135 feet with its limits still unknown. The management is said to be uncertain whether the ore body is being opened by a drift, or cut through by a crosscut. The deposit is assertedly among the largest ever opened in a Nevada gold mine. The company is preparing to treat the ore in the old War Eagle mill until a modern plant can be assembled.

The Mascot Valley Company plans to keep its Bluestone concentrator operating indefinitely on ore from the Bluestone and Mascot Valley mines near Yerrington, but will probably close the Thompson smelter this month. New plans call for the daily concentration of 600 tons, with concentrates to be sent to a custom smelter.

## Seven Troughs Mining Starts Work on Mill

The Seven Troughs Extension Mines Company, A. L. Beardsley of Los Angeles, president, having completed extensive work in the development and exploration of its property in the Seven Troughs district of Nevada, and after having made exhaustive and satisfactory metallurgical tests on the run-of-mine ore, has decided upon mill construction, and is now shipping mill machinery and equipment to the mine with the expectation that the plant will be ready to begin regular ore treatment within the next ninety days.

During the past two years the development of company property has been under the direction of O. W. Warmoth of Lovelock, Nev., vice-president. Mr. Warmoth was formerly superintendent of the Seven Troughs Boersing Mines Company, now engaged in a large program of mine development. He states that sufficient ore of high-milling grade has been opened up in the workings of the Extension Mines Company to keep the new milling plant in continuous operation for several years.

From shallow workings of the mine, it is stated, leaders have shipped about \$50,000 in gold ore containing values ranging from \$100 to \$200 per ton. The company believes it will experience no difficulty in keeping the average of mill ore treated above \$15 per ton.

## OIL COURSES OFFERED

Registration Will Open Today For Technical Classes

Registration opens today for evening college courses in petroleum technology, petroleum geology and petroleum engineering, at University College, downtown division of the University of Southern California in the Transportation Building, Seventh and Los Angeles streets.

Laird J. Stabler, specialist in the chemistry of petroleum oils, will have charge of the course. Allan E. Sedgwick, consulting petroleum engineer, is to head the Tuesday evening course in petroleum geology, as well as the Wednesday night course in petroleum engineering.

## BENA WILDCAT IS PLANNED

Elmer Company to Drill Near Bakersfield

Locality Never Before Has Been Prospected

Getty Spuds in on Lease at Fellows

BAKERSFIELD, March 10. (Exclusive)—The most interesting development of the week in this district is the projected wildcat well to be drilled near Bena by the Elmer Oil Company. The location is Ben 13, 30-30. It is said that this particular locality, east of the city, never has been touched by the drill, so its progress will be interesting to landowners and operators. The Elmer organization, which sprang into being at Hollywood, also is drilling a deep test hole in the Rio Bravo district, on the West Side.

George F. Getty, Inc., which completed a road to the Phelps lease on Sec. 23, 31-22, west of Fellows, has spudded in its Phelps No. 1 well, and will rush drilling down to the level where oil sand is expected.

The General Petroleum Corporation has drilled 100 feet in the Hensley No. 3 well on Sec. 22, 29-27, in the Fruitvale field. The well was spudded in early in the week.

The Honolulu Consolidated Oil Company has its No. 25 well on Sec. 6, 23-34 in the Midway field well under way.

The Petroleum Securities Company has spudded in the Olde No. 10 on Sec. 21, 27-28 at Poco Creek. Bolders are being set for the Olde No. 1, on Sec. 6, 29-29, and the location for Olde No. 2 has been selected as being 200 feet north and 200 feet west of the southeast corner of the southwest quarter of Sec. 6.

Three tests for water shut-off were successfully completed in the Poco Creek field. They were the Superior Oil Company's No. 1 and the Signal Oil and Gas Company's No. 1, both on Sec. 27, 27-28, and the General Petroleum Corporation's No. 25 on Sec. 21, 27-28.

## DRILL HOLE IN ARIZONA SETS MARK

Prospecting Project on Mine Property Near Ajo Down 2200 Feet

TUCSON (Ariz.) March 10. (Exclusive)—The deepest drill hole in Arizona is one sunk at Ajo, on the Hoval Smith-Van Dyke bond, near the New Cornelia. A depth of about 2200 feet has been attained.

"Geographical survey" is being made by the National Company of Los Angeles of the Mollie Gibson claims, near Patagonia, between the Mowry and Morning Glory mines. The property is owned by the Arizona Consolidated Copper Company. William A. Aulman of Los Angeles is in charge of the novel prospecting work, which seeks definition of underground ore bodies by an electrical method of detection apparatus, said to have been used elsewhere in Arizona, with success.

An old Spanish mine, known as the "Cerro de la Cruz," rediscovered near Tucson and is being reopened by E. J. Freilinger and J. A. Antebauer of this city. Three old workings have been found, one with a sixty-foot tunnel to a point where stone steps lead downward to a choked level. Old Spanish chronicles of the probability of rich reserves in the locality, with inclusion of "The Mine with the Iron Door."

Extensive changes and additions are planned for the property of the Keystone Copper Mining Company, north of Dragon station. There is to be alteration of the milling plant, deepening of the Hagerman shaft and placing of heavier surface equipment. The property recently was examined by Lewis E. Ashbaugh of Denver.

## OUTLOOK AT OLD COLONY PROMISING

Management Says More Than 1,000,000 Tons of \$30 Ore in Sight

KINGMAN (Ariz.) March 10. (Exclusive)—About 4000 feet of drifting has been done on the Old Colony property, with declaration by the management that over 1,000,000 tons of \$30 ore has been developed in veins on the St. George Foundation and Banner sections of the property.

The plan of development has included the running of four tunnels, at 300-foot intervals of depth, with raises now being driven to connect the levels. The next feature is to be establishment of a large flotation mill at the portal of the lowest tunnel.

In the Democrat property new exploratory work has just cut the old workings in a section where claims much high-grade ore in pioneer days. Some of this ore paid to ship down the Colorado River to San Francisco and even to Walla Walla.

Good ore is being struck on several of the Tom Reed leases in Oatman, according to Royce de Chase, on the San Harrison claim. On the Asico exploration, deeper sinking in the mine from the 400 level is to be done by the use of pumps that have been ordered. The ore body at that point is of demonstrated size and value and is expected to furnish a minimum tonnage for the mill as soon as the water situation has been overcome.

## ILLIPAH SEARCH TO BE RESUMED

RENO (Nev.) March 10. (Exclusive)—Drilling is to be resumed about April 1, next, on the test well drilled last year to 1000 feet in the Illipah district, White Pine county, Nevada, where operations were suspended last fall. The drilling will be carried on by the Illipah Petroleum Syndicate, a Nevada corporation, with headquarters at Reno.

Possibilities for oil at Illipah were reported as far back as 1908. The prevailing opinion is said to be that the district consists of possibly five pools, all in White Pine county, covering townships No. 3, No. 16, No. 17 and No. 18, north, in ranges No. 56 and No. 59, east.

The most recent report was sufficiently encouraging to bring about the drilling of a deep test well, which went to 1072 feet before it was lost through mechanical accidents, and after it had developed, according to reports, strong showings of oil testing above 35 deg. gravity and wet gas rich in gasoline content.

The present well was started last year forty feet from the first hole. Cable tools have been used. President J. E. Amenda of the company, pioneer operator in the district, says that the log shows a formation identical with Teapot Dome in Wyoming and with the Montana fields.

The sandstone which is exposed along various points in the thirty-mile area near gasoline odor and oil in at least a dozen remote places. The shale beds are of rich Colorado black type. Its test has produced as high as 35 deg. gravity of oil to a ton and gases that are high in gasoline content. The entire field consists of two sections from the southeast to the northwest against a perfect segment of fault line and at least thirty miles in length.

During 1928 the Reno Trust Company was formed to acquire control of the Illipah Petroleum Syndicate, the White Pine Oil and Gas Company and the California Nevada Oil Company, which controlled 30,000 acres covering practically the entire prospective area. Officers and directors of the Reno Trust Company are J. E. Amenda, Reno, president; E. P. Sides, Reno, first vice-president; Dr. F. E. Nichols, Fallon, Nev., second vice-president; E. B. McGowan, Reno, secretary-treasurer, and Hon. F. E. Baltus, Governor of Nevada.

The Reno Trust Company has made a subsurface covering Secs. 8, 17 and 20, 37-39, to the Washoe Oil Company, recently organized, which will drill on the monocline on either Sec. 8 or 9, not later than May 1.

## ARIZONA WELL GIVES PROMISE

Gas and Oil Showings in Pima Test Reported

Bore One of Several Worked on Intermittently

Prospecting in Eastern Part of State Active

TUCSON (Ariz.) March 10. (Exclusive)—Reports come from Pima, Graham county, that at 2300 feet the drill of the Vaughn Oil Company has cut an oil formation. The driller reports that the well "is showing considerable gas and oil." A half-dozen drilling rigs have been intermittently active in this locality for several years past, much of the time complaining of delay because of water sands, both fresh and salt, and usually quite hot.

Near San Simon, on the eastern line of Arizona, S. W. Funk, a Californian, is down 1500 feet, but has suspended work.

Near Bowie are the Whitlock and Pinal wells, on which Arizona capital has been expended in large amounts, with several reports of striking oil sands. The statement is made of probability of early resumption of drilling there.

A heavy rig is operating on the Colgiaster ranch wildcat near Benson, on the Tucson road.

An organization of Bibbee and Douglas men has bought 640 acres in Sulphur Springs Valley, north of the latter city, and announcement has been made that capital has been subscribed for the cost of exploration for oil and gas.

# MAKE MONEY IN HOLLYWOOD

You can make money by investing in Hollywood income and business property. Values are advancing. Many fortunes have been made from small investments and many more will be made by those that take advantage of present opportunities.

February building permits for all Los Angeles were nearly Ten Million Dollars—and while Hollywood represents only about one-tenth of the population—Hollywood permits were more than one-fourth of the total.

If you have idle funds for investment—and want sure and sure profits—let us tell you of Hollywood opportunities—big or little. Today's new law makes safe-guarded plan you may invest small amounts—\$100 and up, in Hollywood income property, right in the very heart of Hollywood.

Ten thousand Gladstone 1928, or more the coupon below for details. Better still, call and see us in person. At any rate, get the facts right now and invest.

# 10,000,000 Republic of Chile

## External Loan Sinking Fund Six Per Cent Gold Bonds

Dated March 1, 1929 Due March 1, 1932

Cumulative Sinking Fund Will Operate to Redeem Entire Issue by Drawings at Par.

Interest payable September 1 and March 1. Coupon Bonds in denominations of \$1,000 and \$500, registered as to principal only. Principal and interest payable in New York City in United States Gold Coin of the present standard of weight and fineness, without deduction for any present or future tax, at the head office of

THE NATIONAL CITY BANK OF NEW YORK, Fiscal Agents.

Interest shall also be collectable, at the option of the holders, in London, England, either at the city office, of the National City Bank of New York or at the office of N. M. Rothschild and Sons, in pounds sterling, at the present rate of \$100 per pound sterling.

The proceeds of the present loan as well as the \$2,000,000 being offered simultaneously in the London market by Messrs. N. M. Rothschild and Sons will be applied to the construction of public works such as railways, irrigation works, port works, sewage and water works and public buildings. The Government of Chile is now carrying out a comprehensive plan of public works, as authorized under law number 4303 which provides for an expenditure of \$25,000,000 pesos (\$27,374,062) in 1929, which is to be provided for in part from the proceeds of the present dollar and sterling issues.

Chile with a population now estimated at over 4,200,000 has an area of 290,000 square miles. The leading industries are agricultural and mining. Agriculturally the country is self-supporting and its mineral output averages approximately \$250,000,000 per annum. American capital invested is estimated at over \$550,000,000 and British at over \$350,000,000.

The Chilean government is carrying out, with modifications a program of administrative reform outlined by the Kemmerer Financial Commission in 1925. This has resulted in the stabilization of the currency on a gold basis. The establishment of a central bank of issue, a general budget law with a balanced budget, and the installation of an independent comptroller general. Various measures have been passed to stimulate the economic development of the country, taxation has been reorganized and economies effected by a reduction of personnel and control of expenditures.

The gold and gold exchange held by the Banco Central de Chile on February 15, 1929, was \$59,995,622, providing a ratio for gold cover to notes outstanding and deposit of 97.67%.

The ordinary revenues for 1927, excluding loans as reported by the Comptroller General totaled \$110,607,400 as compared with ordinary expenditures \$110,185,555. The corresponding figures for 1928 are \$124,222,449 and \$119,561,829, giving a full expenditure of \$4,660,620. The budgetary for 1929 places ordinary revenues at \$135,662,452 and ordinary expenditures at \$130,374,019.

The total indebtedness as of December 31, 1928, including all guaranteed obligations was \$416,037,654, of which \$291,429,555 was a direct debt of the government.

The foreign trade in 1928 included imports totaling \$142,303,079 and exports totaling \$239,181,687, of which \$40,360,616 of imports from the United States and \$75,159,582 of exports to that country, nitrate exports during the year ended December 31, 1928, totaled 2,798,900 metric tons, compared with 23,735,000 metric tons exported during the preceding year. Copper productions during the year ended December 31, 1928, totaled 277,419 metric tons, compared with 239,325 metric tons produced during the preceding year.

Application will be made to list on New York Stock Exchange.

Price 93 1/2 and Interest, to yield 6.48 to Maturity

One Million of this issue will be publicly offered in the Netherlands by Plesner and Company, Netherlandische Handels Maatschappij Me Delacoe and Co., Prochi, Guttman and Vermeer and Co., Amsterdam and \$800,000 will be publicly offered in Sweden by the stock firms Enskilda Bank, Stockholm.

## News From Petroleum Fields and Marts of Trade

### KETTLEMAN OIL SITUATION TOLD

Twenty-five Wells on Way or Preparing to Start

Water Test of Old Ochsner No. 2 Holds Interest

Discovery Project Production 3500 Barrels a Day

Twelve wells drilling, nine preparing to build derricks, four locations approved, one well making a water test and one producing is the weekly summary of activities at

Kettleman Hills. Six of the twelve wells drilling are over 3000 feet deep. Interest for the next few days will be centered in the General Petroleum Corporation's water test in the old Ochsner No. 2, on Sec. 26, 22-18. Tubing was run into the hole Saturday and swabbing started last night. The six-and-eight-inch casing will be tested at 6512 feet for a water shut-off. The total depth of the hole is 6721 feet. This is one of the older projects of the field, having been started long before the discovery well was completed.

General Petroleum has spudded in Ochsner No. 20-3 and is drilling at 312 feet. Its Ochsner No. 20-1, No. 20-2 and No. 20-4, all on Sec. 20, 22-18, are approved locations on which work has not been started. The Standard Oil Company, the largest operator and land owner in the field, has three wells drilling and five locations in various stages of preparation for drilling. The company's No. 8 is drilling at 3309 feet, the No. 41 is standing cemented at 1800 feet and the No. 81 on Sec. 11, 22-17 is drilling at 4700 feet. It is the deepest of the new wells in the field. The No. 84, No. 78, No. 87 and No. 81, on Sec. 18, 22-17, are rigging up and foundation is being poured for the No. 61. The casing collapsed in the old well at this location two weeks ago, and the rig was skidded.

The Millam Exploration Company's Elliott No. 1, discovery well, is making 2500 barrels of oil per day. While Elliott No. 2 is drilling at 3040 feet, Beal No. 1 is drilling at 2954 feet and Kennedy No. 1 is drilling at 2945 feet.

The Marland Oil Company's No. 2-19 is drilling at 1380 feet and its No. 12-8 is drilling at 3345 feet.

The Bolea Oil Corporation is assembling equipment and preparing the location for its Ferguson No. 1.

The Armstrong No. 1 of George F. Getty, Inc., is drilling at 4317 feet. The Petroleum Securities Company's Felix No. 1 is rigging up nearby, the location for Beal No. 1 on Sec. 14, 22-17 is being graded, and location has been approved for Beal No. 1 on Sec. 22, 21-17.

The Shell Oil Company's Armstrong No. 1 is drilling at 2023 feet. The Ohio Oil Company's No. 1 is drilling at 970 feet. Rice is being built for the Associated Oil Company's Watson No. 1.

**Test Arranged at Summerland**  
A new test of the Summerland structure some distance back from the ocean is to be started by a Los Angeles syndicate in a few weeks. The derrick is being erected on the E. Z. Harris property and drilling equipment is being delivered there. A rotary outfit is to be used in drilling the test. It is to be located a few blocks east of the old Becker well near the highway, on which drilling has been suspended.

### RARE MINERALS, METALLURGY, CHEMISTRY

Qualitative analysis will be given to the department for the purpose of determining the nature and amount of the minerals present in the sample.

**Not Kaolinite**  
GOODERICH (New) Feb. 24. Question: The sample enclosed comes from the Yellow Pine mining district and I believe it is high-grade aluminum ore. If not high grade, has it any other commercial value?

Answer: The sample is a siliceous conglomerate giving a reaction for iron. If fire assays on similar rock give no return for gold or silver it would be a very doubtful ore of any value.

**Doubted Bentonite**  
DOUGLAS (Ariz.) Feb. 24.—Q: I am sending you under separate cover sample of clay located near Amboy, Cal. Is it bentonite?

D. A: The sample does not swell up in water. It is a heavy, clay-like material, impure with iron oxides. It seems to be a mixture of hydrous aluminum and hydrous magnesium silicate.

**Three Specimens**  
MONO LAKE, Feb. 25.—Q: Is No. 1 monazite? What is No. 2? The barrel up sample No. 3 is what? No. 1 is from a large ledge near Mono Lake.

G. A: Sample No. 1 is altered rock. It is a mixture of quartz, feldspar, traces of sandstone (glassy feldspar), some altered garnet, pyroxene and some unaltered quartz. It is a blackish, glassy-coated, burnt and siliceous rock; iron present and showing traces of peacock iron. No. 2 is a brownish-yellow thumb specimen carrying silica, hydrous iron peroxide (limonite), and gave a slight reaction for lead. It is not a core of uranium, and carries a trace of gold.

**Four Samples**  
LOS ANGELES, Feb. 25.—Q: Would be very much obliged if you would let me know if even one valuable ore or mineral is in this stuff. Sample No. 1 is gravel with quartz like pebbles intermixed. No. 2 is from a big deposit, with No. 3. It seems to be same stuff as No. 1. No. 4 stuff comes next, (yellowish stuff with brown-white quartz). I respectfully thank you for information, and for past favors.

E. A: No. 1 is gneiss, and known to the mining boys in the hills as soft granite. No. 2 is granite. No. 3 is altered rock, carrying quartz, feldspar, (orthoclase) black mica, (biotite) muscovite (polish mica) iron oxides, and microscopical black tourmaline (schorl) with microscopic hornblende. No. 4 is chiefly silica, mixed with feldspar and mica and altered granite.

**Mexico Samples**  
LOS ANGELES, Feb. 25.—Q: Will you kindly classify the following three rocks? No. 1 is apparently an opalized rock and occurs with No. 2, which I think is mesenchyma. In sample No. 3 hornblende? These came from the central part of Baja California, Mex.

D. A: No. 1 is a mixture. It cuts glass easily, reacts for flint, and opal silicate is present. No. 2 is probably fossiliferous; it floats on water until the interior all up with water and then sinks. It runs high in opaline silica with some quartz of coralline, spongy form, and tough texture. Rather abundant Meerschaum. No. 3 is not bauxite. It appears to be mineralized partly on the order of No. 2.

**Utah Specimens**  
MONTICELLO, Feb. 27.—Q: Under separate cover am sending you samples of ore and would you kindly tell me what it contains? The samples are from Marysville, Utah.

S. A: The yellowish-brown thumb specimens do not react for uranium; therefore, are not carnotite (double vanadate of uranium and potassium). Further analysis shows that hydrous aluminum and magnesium silicates are present with more or less limonite (hydrous iron peroxide). Among the samples is a whitish chalcocite, (a variety of quartz) and on one corner thereof, moss agate was found.

**Rock**  
LOS ANGELES, Feb. 27.—Q: Would you please explain very heavy blue-black crystals in this specimen. Looks like magnetite, and found near Mount Shasta.

A. A: The sample is partly a tough variety of diorite, and the heavy rocks of that group. Did not find any blue-black crystals. Iron silicate present with some manganese and hornblende.

**Two Samples**  
LOS ANGELES, Feb. 28.—Q: Please analyze the enclosed sample. What does it consist of? O. A: The sample is mostly iron pyroxene, and it was not tested for titanium.

**Quartzitic Rock**  
CASTAJO, March.—Q: I am sending you a package of rock for analysis and it comes from a big ledge. Does it carry gold or silver and what do you call it? E. A: The samples are stained with

### MINES CONCERN FORGING AHEAD

Mountain Copper Rushing Ore Development Work

Flotation and Cyanide Mills Being Installed

Plants Expected to be Ready Within Ninety Days

SACRAMENTO, March 10. (Exclusive)—With 100 men on the payroll the Mountain Copper Company is rushing ore developments at its No. 6 mine, adjoining the Iron Mountain property in the Keswick field, near Redding, and building flotation and cyanide mills. Both plants are expected to go into commission within three months. The No. 6 mine is reported to contain a large tonnage of copper ore, with present red-metal prices enabling the company to mine low-grade material at a good profit. The company was the first to operate on the Shasta copper belt, and was long the premier red-metal producer of California.

The Sliger Mining Company reports that a thirty-foot ledge averaging around \$12 in gold per ton has been opened on the 500-foot level of its mine near Placerville. Daily production averages twenty-five tons, and the management is preparing to add another shift to its mill crew. It has produced 60,000 in the last two years, and new developments indicate a long period of profitable activity.

The Belmont Metals Corporation, operating the old Colorado gold group, eight miles from Mariposa, states that an ore body from three to four feet wide has been developed for 141 feet, with values averaging around \$60 per ton. The development is considered the most important made on the eastern section of the Mother Lode in many years, and has stimulated work on several properties in Mariposa county.

President E. C. Klinker of the California Premier Company, working the Big Oak and Rising Sun gold mines near Colfax, asserts that a twenty-stamp mill will be placed in commission soon, and the power plant enlarged.

### OFFICERS VISIT MINE

Big Jim Group Spends Week-End at Arizona Property

The directors of the Big Jim Mines, Inc., accompanied by twenty of the largest stockholders of the company, have returned to Los Angeles from a week-end visit to company holdings near Patagonia, Ariz. Accompanying the visitors was L. F. S. Holland, company engineer. The occasion for the visit was the bringing into full production of the Harbottle mine which the company recently acquired and placed in operation.

The selective flotation mill has been increased in its capacity from seventy-five to 130 tons daily. The mill was running at full capacity at the time of the visit, and the party spent one day watching ore treatment, and one day in inspecting the Big Jim and Harbottle mines.

No. 4 of 6 Series on the Area Served by the Associated System

### Electric Power For Western Pennsylvania

### Center Of The Nation's Wealthiest Market

70% of the wealth of the United States is concentrated in that area extending from the Mississippi River to the Atlantic Ocean, and from the Great Lakes to the Ohio River. 50% of the nation's population, nearly 60,000,000 people, is gathered within this area.

Over 350 cities and towns in Western Pennsylvania, the center of this huge and prosperous market, are served by the Associated Gas and Electric System. These communities offer industry a strategic location free from the congestion of the large industrial centers. They offer

Abundant labor.  
Water, coal, oil and gas at moderate costs.  
Adequate electric power at attractive rates.  
Low tax cost.  
Transportation by four trunk line railroads and two branch lines.

This old and established industrial area offers distinct advantages to established industries as well as new enterprises. Authentic advice and information may be obtained without obligation from our Industrial Department. Write to

### Reports From DEVELOPMENTS SHEET OPINION

Monmouth Area Finds Upset Beliefs on Oil Formation

Discovery Well May be on East Edge of Structure

Investment Hopes Now Assume Considerable Importance

Monmouth Area of shale and sand is reported to be the formation in the east-west line of the Llewellyn drilling hole, as reflected by cores from the oil well, that it generally is not elsewhere in the district. This is a substantial discovery, as the time the discovery well was drilled, the geologists of the other companies believed that the oil was along the edge of the structure. This opinion was influenced by a core from the discovery well, which indicated that the structure was a north and south anticline. It was along this line that the majority of the discovery wells now drilling were located.

**SHIFT IN OPINION**  
Developments of the past week indicate that the Smith discovery well may be on the extreme edge of the structure, but to the western edge. This opinion gives several other companies considerable importance. The Smith Oil Company's Peck No. 1, more than half a mile west of the discovery well, now has an interesting test. It is at 401 feet. Smith's Barre No. 1, about 1000 feet north and east of the discovery well, is at 3800 feet and is down 3800 feet.

Richard Oil Company's No. 1, near "one mile" test, is drilling at 3382 feet. Standard Oil Company's No. 1, deeper hole in the same field, is down 3254 feet, in shale with oil sand, and the test is to be made about the middle of the month. It is probable that a substantial test will be made during the month.

**TEST PLANNED**  
The Pacific Western Oil Company has contracted with the five-inch casing at 5000 feet in the No. 2, nearest of the wells to the discovery well. The hole is at 5751 feet. It is planned to make a production test in this hole after securing more of the formation. The company's Howland No. 1, to the east, is casing shale and made at 3828 feet. As is company's Harvey Smith No. 1, 1000 feet.

Has been landed in the well of J. E. O'Donnell, and it will be made about the middle of the month. The cores show layers of oil sand and shale.

Superior Oil Company's No. 1, second deepest hole in the field, is drilling at 6114 feet in the shale of oil sand.

**MILITARY POWER & LIGHT SYSTEM**  
**Interstate Power Company**  
PREFERRED STOCK DIVIDEND NOTICE

The Board of Directors of the Interstate Power Company has declared the regular quarterly dividend of One cent and twenty-five cents (\$1.25 per share) upon the outstanding 17,000,000 shares of the Company, payable on March 15, 1928, to the holders of record as of the date of business on March 15, 1928.

**United Public Utilities Company**  
Regular Quarterly Preferred Dividend No. 4

Regular quarterly dividend of One cent and twenty-five cents (\$1.25 per share) upon the outstanding 17,000,000 shares of the Company, payable on March 15, 1928, to the holders of record as of the date of business on March 15, 1928.

**Capital**  
The company is planning to organize a new company to acquire the assets of the old company, and to issue new stock to the holders of the old stock.

A HOUSE DIVIDED

Within sixty days the electorate of Los Angeles will nominate candidates for the offices of Mayor, City Attorney, City Council, Board of Education, Municipal Court and various other city departments.

None of the offices to be filled is more important than that of Mayor.

This city needs a strong man in the Mayor's chair. It needs a Mayor qualified not only by ability and experience to administer the actual functions of the position, but one possessing such qualities of courage, integrity and energy as to assure him recognized leadership in the community's general affairs.

Conditions in Los Angeles are not as bad as conditions in some other metropolitan areas in the United States, but it is equally true that drastic and far-reaching reforms are immediately necessary if this city is successfully to combat evils which do exist here and which have been rapidly increasing during the last seven or eight years.

The city government of Los Angeles for almost a decade has been in the hands of professional politicians whose chief purposes have been wholly selfish. An organized minority has been able to reward its political friends and punish its political enemies with impunity.

Political bossism has deadened the sense of civic obligation which should be uppermost in the aims of every holder of public office.

Los Angeles has witnessed a striking example of the distressing results that follow the election of an ordinarily well-meaning, but weak man as head of its public business. It is probable that few men and women in Los Angeles regard George C. Ryer as deliberately responsible for the situation now confronting the community.

The retiring Mayor, however, cannot escape a share of the condemnation that falls upon the regime in which Kent Parrot, H. H. Kinney and their political associates have held so prominent a place.

When Los Angeles casts its collective ballot for Mayor in the May primary election and later in the final election in June, there should be certainty in the minds of each elector that he is doing his individual part in helping to eliminate the political gang of which Parrot has been the head.

Parrot and C. Ryer and Kinney have had a political squabble, the first fruit of which is the voluntary retirement of C. Ryer, the infernal elimination of Kinney and the transfer of political activity by Parrot. Just where Parrot has placed his new political headquarters is a matter for conjecture. That he wants to retain a measure of political dominance in municipal affairs and that he will make every possible effort to keep his political machine intact may be accepted as absolute fact.

The machine that has maintained C. Ryer in office will have one or more substitutes in the forthcoming campaign. Such individual or individuals may be heavily disguised, and may actually disclaim political kinship with campaign allies of the Parrot stripe, but the machine will be as active, as well financed and as resourceful as ever.

Danger of machine success is by no means negligible, and, except for an alert and informed electorate, may be logically expected.

The machine minority is organized, desperately determined to remain in power, and is directed by professional politicians well acquainted with every ruse, maneuver and gesture heretofore found effective in hoodwinking or confusing public opinion.

And the actual menace to reorganization of our municipal government lies not so much in the efficient working of the city's discredited political machine as in the divided councils of those forces in Los Angeles which, individually and collectively, are opposed to the machine and which seek a cleaner, stronger and more aggressive administration of city government.

In other words, the majority is disorganized, divided, and in controversy. It is under such circumstances that a minority rules.

Although the time for filing nominating petitions for a candidacy for Mayor has not expired, it is already apparent that there are too many candidates in the Mayoralty race. That is, too many for the good of Los Angeles.

From some points of view, it is conceivable that a large number of candidates anxious to serve the public good will accomplish the ends desired, but in Los Angeles at this time such a condition does not exist.

There should be a thinning out of the ranks of Mayoralty candidates and a combining of the best elements to elect a Mayor who will represent all the people. Several well-qualified citizens either have announced their candidacy or have indicated an intention of entering the Mayoralty contest. Each is backed by some organization or group of organizations identified with the constructive interests of the community. Each, if elected, doubtless would do his best to compass an efficient administration of the Mayor's duties.

With all remaining in the contest, however, the defeat of all is almost certainly assured; the retention of bossism and machine politics virtually guaranteed.

This is a matter calling for thoughtful and impersonal consideration by the candidates themselves and by their several backers. Eventually it will become a problem demanding the utmost discrimination from those whose ballots will determine the character of municipal administration in this city during the next four years.

# Gypsy Women Battle Police Who Try to End Riot Over Bride

## TRIO OF GIRLS HURT IN CLASH

Cavalier Held for Running Car Into Crowd

Attempted Abduction of Beauty Charged

Amazons Defend Camp as Men Go to Town

A stormy riot in a gypsy camp over a cavalier's attempted abduction of a \$6000 dark-eyed bride last night sent three girls of the tribe to Georgia-street Receiving Hospital with serious injuries and jailed Louis Adams, 38 years of age, on a charge of assault with a deadly weapon after two squads of police had rescued him from a screaming, stone-hurling mob of women and children.

According to Adams' story to Detective Lieutenants Broady and Krawald, he had paid \$3000 gold for a gypsy bride, whom he did not want. Yesterday he drove to the camp to claim her. In the general uprising of indignant women he was surrounded by flying sticks and stones and yelling tribeswomen.

### DRIVERS THROUGH MOB

In his haste to escape the assembled Amazonian attack Adams, who is a member of the tribe, told the police that he started his car and drove headlong through the mob. Three girls were run down.

They are Mary, Ruby and Rosie Pickles, 16, 22 and 1 years of age, respectively. They were taken to the hospital where Mary and Ruby may die, police persons say, because of internal injuries.

Roads told the investigating officers that Adams, in the absence of the gypsy menfolk in town, was left to guard the camp at 4701 Alabama boulevard. He said he became intoxicated and ran amuck with an ax and a gun until he was disarmed. Then, he says, he climbed in the automobile and ran over the mob.

### SQUAD POWERLESS

At the height of the riot Broady and Krawald arrived on the scene with a riot squad from Lincoln Heights police station. Adams was surely held by the women. The first riot squad was unable to extricate him from the position. A hurried call was sent to Lincoln Heights for reinforcements and another squad of police sped in the camp. Adams was rescued and jailed. A squad of officers was detailed at the camp to prevent further uprising.

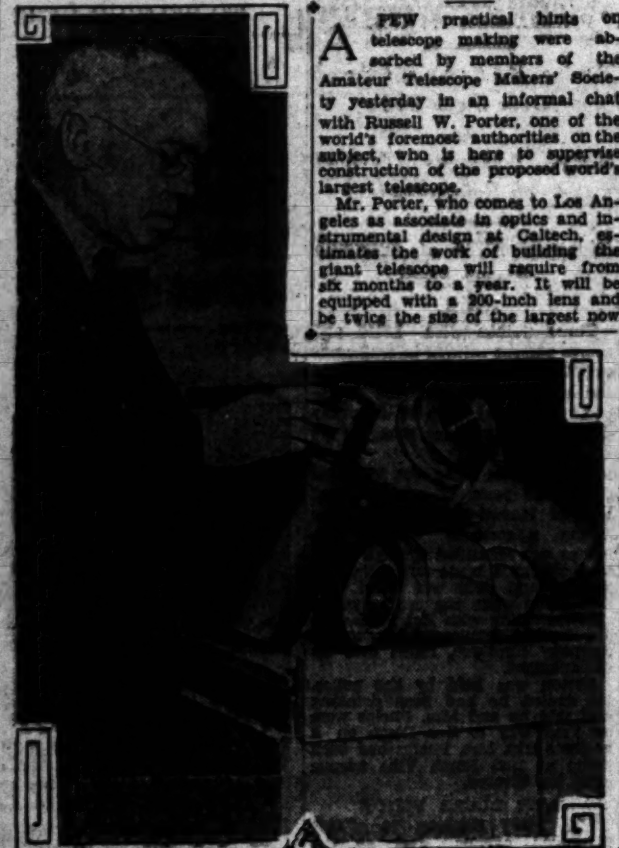

An investigation was started immediately to determine the facts of Adams' assertion on the gold barter for the bride, and a concurrent inquiry began on the 8-year-old girl's story that he deliberately injured the trio of girls.

### APPEALS UP TODAY

Appeals against the confirmation of the assessments for the improvement of California street and Durban boulevard will be heard by the City Council today.

## Judge Orders Return of Lot

After hearing testimony for several days Superior Judge Shipman ruled that Nick Glanzen and his wife Mrs. Viola must return to Mrs. Viola Scollins a lot at the northwest corner of Beverly boulevard and Hollywood drive. The property is valued at more than \$40,000.

In the trial of the suit Mrs. Scollins asserted that she deeded the property to Glanzen by mistake while he was acting as her interpreter, she being unable to speak and write the English language. Later, it is asserted, Glanzen deeded the property to his wife who refused to return it, contending it was hers under a property settlement. In the trial of the suit the defendants denied there had been any fraud practiced in the deed.

## RULING PERILS MANY DECISIONS

Damage Case Judgments May Be Set Aside

Actions for \$1000 or Less Filed in Wrong Court

Superior Bench Declared Without Jurisdiction

Several hundred damage suits aggregating hundreds of thousands of dollars, filed in Superior Court during the three years ending December, 1928, were filed "out of jurisdiction" and are therefore subject to being set aside, according to a decision just handed down by the Court of Appeals.

This decision, in the case of the Williams Company vs. H. E. Van Till, probably will result in a wholesale scramble by disappointed litigants to set aside cases unfavorable to them, attorneys believe.

The case cited was brought by the plaintiff, a real estate company, to recover a commission of \$825 from Van Till. It was filed March 28, 1928, in Superior Court. This was nearly a year after the municipal courts had been established with jurisdiction over all cases originating in the city, including those less than \$1000.

### OPINION GIVEN

Many attorneys were of the opinion at that time that the Superior Court and the Municipal Court had concurrent jurisdiction over such cases. The matter was brought to the attention of County Counsel Malton, however, and Deputy Counsel Prichard was assigned to the case. He wrote an opinion that there was no concurrent jurisdiction, but the municipal courts were the only courts where such cases could be tried. So when the Williams case was brought to trial, Prichard appeared as a friend of the court and depurposed to the taking of testimony in the case on the case was set aside.

Superior Judge Yankwich, before whom the case was set aside, indicated to Deputy Prichard's arguments and sustained his demurrer. Meanwhile a constitutional amendment ended the disputed concurrent jurisdiction of the two courts, and as a result all suits in which less than \$1000 is at stake are being filed in municipal courts.

### OPENS UP DOORS

It is pointed out by attorneys that the Appellate Court in sustaining the decision of Judge Yankwich, has opened the door to what may be almost endless litigation, the expense of which will be borne by the plaintiff. The officials involved had headed the opinion prepared by County Counsel Malton's for the case, but the decision, however, it is believed that municipal courts will be able to handle the bulk of the Superior Court in all cases where issues have been squarely met.

## SLAYER DUE TO LEARN FATE TODAY

Death Penalty Faced by Negro in Christmas Day Row Tragedy

Convicted of first-degree murder in connection with the "Christmas dinner" slaying December 23, 1928, of Mrs. Jennie Clifford, James Chandler, negro, is scheduled to appear before Judge Applegate today for sentence carrying the death penalty.

Mrs. Clifford, also colored, is said to have been fatally injured in a row with Chandler that started when the latter struck her with a glass. Chandler then purchased for their Christmas dinner, Chandler, according to testimony at his trial, finally hit Mrs. Clifford with a glass of cranberry sauce, "trimmings" for the Christmas dinner. Mr. Clifford is said to have suffered fatal concussion from the blow.

It is expected imposition of sentence will be delayed today when Chandler's attorneys file a motion for a new trial.

## CRASHES KILL THREE WOMEN

(Continued from First Page)

First aid at the Georgia-street Receiving Hospital. A fractured leg was received by J. Davitt, a pedestrian, Saturday night, when he was struck by a car at Ocean avenue and Broadway. Some time later, Stephen Hovey, 2330 Lyndon avenue, Santa Monica, driver for a Venetia bakery, reported his car was in second gear when Davitt was hit. Rain-obscured vision is blamed for the accident. The injured man, who lives at 1439 1/2 Georgia street, Santa Monica, was taken to Martin's Hospital, Davitt was not held.

Nicholas Podila, Lucile Ornelius and Cleopatra Perry were seriously injured shortly before dawn yesterday when their automobile skidded in the sand on the State highway about six miles west of Indio and overturned, pinning them underneath. Podila was taken to the County Hospital, Perry with a broken head and an injured thigh. The other two suffered lacerations.

The overturned car and its hapless occupants were discovered by C. O. Reed of Maywood, who was driving a truckload of hops to Indio. A moment later J. A. Dugan of Wil Metter street, Los Angeles, approached and aided Reed in extricating the injured. While the rescue was being made, a Pickwick bus operating from "Tom Hammock" of 794 Keenan street, Los Angeles, came to the scene. Blinded by the lights from the other cars, Hammock failed to clear the hop truck, which the bus sideswiped, liberating the hops. None of the bus passengers were seriously hurt. The hops were recaptured.

## BOX LUNCH BEAUTY DOES DANCES TOO

Donnie Hutson

Donnie Hutson

Donnie Hutson

Donnie Hutson

Donnie Hutson

Donnie Hutson

### Donnie Hutson

If the unsuspecting pass by the northwest corner of Santa Monica boulevard and Cheltenham avenue any day between the hours of 8 a.m. and 1 p.m., and view a figure clad in sweater, white duck trousers, Russian boots and a yachtmans' cap bounding, circumventing, twisting and swaying hither and yon on the sidewalk, let him not be alarmed, for it is not an apparition and his eyes do not deceive him.

It is none other than Miss Bonnie Hutson, vendor of box lunches, who believes in serving them up to her public in a lurching, and just by way of proof that it's not a half bad idea, she says that she disposes of an average of thirty box lunches a day, which is considered better than just ordinary in her lunch circles.

Miss Bonnie says that dancing has always been her weakness and just lately she has been taking lessons. So what more sensible than combining business with pleasure and practicing her steps while she waves a box lunch aloft and lures in the nickels and dimes which help to pay for the dancing instructions.

## AUTO EXHIBITION CLOSING TONIGHT

(Continued from First Page)

toward breaking former records. No figures as to total sales are available as yet, but present indications are that they will be satisfactory to everyone concerned.

### MOXION-PICTURE DAY

Moreland, the committee and Manager Roberts last night expressed their appreciation of the splendid co-operation not only of the Shrine board of directors, but of the daily newspapers throughout the two shows, and individual exhibitors. "This spirit of helpfulness was all that made it possible to stage a second coming on such short notice as we had," said Chairman Moreland.

Every exhibit will remain in place until the gates close tonight at 10:30. In tribute to the spirit manifested by the motor car dealers in giving a second show, the entire motion-picture industry is united in making today "Motion-Picture Day" and the biggest of the ten days. It was announced late last night. Many of the notables of the industry will be on hand to greet the thousands attending.

### TROUPE PLANS MADE

Shrine Circus Performers Will Travel in Body from Chicago

A special train will carry the main contingent of Shrine convention Circus Maximus performers here from Chicago late in May, according to Stanton H. Brand, chairman of the event which will take place in the Coliseum on June 4, 5 and 6, next. The various troupes booked to take part in the colorful convention feature are to assemble in Chicago and will proceed to Los Angeles in a body.

The Circus Maximus will have its initial performance on Tuesday afternoon, June 4, following the dress parade to the Coliseum, which will officially open the fifty-fifth annual Shrine convention. \$5000 tickets to all Shrine Coliseum events, including the \$1,000,000 motion-picture electrical pageant, four performances of the Circus Maximus, and two huge dress parades, may be had on application, either in person or by mail, to Al Malatesta, Temple, 607 West Jefferson street, or 1203 Broadway Arcade Building. The season tickets cost \$5.00.

More than 100 articles of everyday use are made of bamboo in China.

## HEBREWS LAY CORNER-STONE

B'nai B'rith Temple Will be Costly Structure

Ceremonies Conducted With Talks by Rabbis

Special Music Program One of Rites Features

With impressive ceremonies, the cornerstone for the new temple of Congregation B'nai B'rith at Wilshire and Robert boulevards was laid yesterday morning. A special musical program was a feature of the rites, while several of the Southland's rabbis delivered addresses.

The new temple, it is promised, will be one of the most magnificent structures of its kind in the world. Its cost, including the site, is estimated at \$1,500,000. The auditorium will have a seating capacity of 3000 persons, and special provision has been made for the religious school, which is to be conducted in conjunction. The building will face on Wilshire boulevard, with the entrances executed in the French style. The Roman style of architecture will be followed in principle, with a touch of Italian Florentine added.

### SPEECHES MADE

At the ceremonies Rabbi Edgar F. Magnin delivered the principal address and laid the final bit of mortar covering the corner-stone. Many documents of historical interest are included in the corner-stone box. Among them are some of the records taken from the corner-stone of the first synagogue in Los Angeles which was located on old Fort street (now Broadway) between Second and Third streets on the site of the old City Hall.

The first synagogue was built in 1852. It was torn down and a new one was built at Ninth and Hope streets. Some of the contents of the corner-stone box of the Ninth-street synagogue are included in the box for the new edifice.

Marco Newmark, son of Joseph Newmark, one of the founders of the first synagogue, read a history of the Jewish church in Los Angeles. This document also is in the corner-stone box. Dr. S. W. Edelmann, president of the congregation of B'nai B'rith Temple also made an address. Dr. Edelmann's father, A. W. Edelmann, was one of the early rabbis of the congregation.

### PLANS REVEALED

George Mosbacher, vice-president of the congregation closed the ceremonies with an address pertaining to the future plans of the church. Announcement was made yesterday that a collection of costly paintings, depicting Jewish history and literature, has been donated to the temple by Warner Brothers in memory of their brothers Sam and Milton Warner. The paintings are being executed by Hugo Ballin and have been pronounced unusually fine specimens of mural art. Temple B'nai B'rith was founded in 1861 and has a membership of more than 600 families. Dr. Edgar F. Magnin has been chief spiritual adviser of the congregation for the last thirteen years. The temple will be dedicated in June.

## ORATORS READY AT WILMINGTON

Six Will Contest Tomorrow at Banning High

District 28 Representative to be Chosen

Scholarship Students Will Participate

Phineas Banning High School of Wilmington will hold its finals in the Sixth National and Fourth International Oratorical Contest on the Constitution tomorrow at 9:45 a.m. before a full school assembly. Six students will compete for the honor of representing the school District 28. They are Kenneth Miller, Phyllis Evans, V. K. Westry, Allan Lind, Ruth Inglis and Mary Swift.

**SCHOLARSHIP STUDENTS**  
Miss Evans has maintained an A card throughout her entire high-school course, winning a C.S.O. pin, and has debated in every interscholastic debate with which her school has been connected during her junior and senior years. This is the second year she has entered The Times oratorical contest. She is a direct descendant of Ulysses S. Grant.

Ruth Inglis is a scholarship student and also has held an A card throughout her high-school course. She represented Phineas Banning in the world-friendship contest last November and placed second in the school elimination of the national oratorical contest in 1928.

**WON, THIRD PLACE**  
Allan Lind took third in the national oratorical school elimination last year and has represented his school in four debates, winning three of them. He is chairman of the forensics and won the district Scout oratorical contest in 1927. Mary Swift, V. K. Westry and Kenneth Miller each have spent but one semester at this high school but are considered strong competitors in the contest.

Walter V. Rittenburg, head of the public-speech department of the school, will preside Tuesday morning and two of the judges will be Mrs. Florence M. Kelly, principal of Fries-avenue school, and Attorney George W. Shunk of Wilmington.

## TWO SONS OF REBEL AT ACADEMY HERE

At the Pacific Military Academy

Two sons of Gen. Miguel Yalla, the Mexican rebel chieftain, whose forces captured Juarez, are students at the Pacific Military Academy at Culver City, it was learned yesterday.

The sons are Miguel, Jr., 14 years of age, and Robert, 11.

The young Mexicans came to Los Angeles last September from Jimenez, Chihuahua, their home city, and enrolled at the military academy. They had no knowledge of the revolutionary movement when they left home and had not heard from their father recently, until they read of his exploits in the newspapers.

Walter V. Rittenburg, head of the public-speech department of the school, will preside Tuesday morning and two of the judges will be Mrs. Florence M. Kelly, principal of Fries-avenue school, and Attorney George W. Shunk of Wilmington.

Walter V. Rittenburg, head of the public-speech department of the school, will preside Tuesday morning and two of the judges will be Mrs. Florence M. Kelly, principal of Fries-avenue school, and Attorney George W. Shunk of Wilmington.

## GIFT GIVING AT EASTER INCREASING

Jewelers Tell of Demand That Indicates Growth of Practice Here

According to members of the Los Angeles Jewelers' Association, the practice of gift presentation at Easter is increasing. The jewelers say this is plainly indicated by the demand at this time of the year for diamonds, watches and jewelry of all descriptions, purchased as gifts for those near and dear and others who are favored for acts of kindness, or for the rendering of faithful personal or business services.

Up until recent years Christmas has had universal recognition as the time for the bestowal of gifts, but the Yuletide season now has a growing rival in Easter. Of course, the quantity of Easter gifts does not compare with the tremendous number during the period of "peace on earth and good will toward men." Of late, however, each year has witnessed a notable increase in Easter giving, and this year in all lines of business it is believed that the gift total will greatly exceed past marks.

According to the jewelers there already has been a substantial showing in the purchase of gifts of lasting memory, and all indications point to a record Easter business.

**Fokker Visits Palm Springs**  
Western Air Express' new \$80,000 trimmored Fokker cabin plane, with Art Goebel as one of the passengers, stopped yesterday at Palm Springs, to permit its passengers to visit the desert resort. The plane will land here today. It was expected yesterday.

The arrival will mark the end of a transcontinental flight that started at the Wheeling (W. Va.) factory of the Fokker company, with Mr. Goebel at the controls. The plane is one of a fleet that will be put into service on May 1 between Los Angeles and Kansas City.

In addition to Goebel, trans-Pacific flyer, the passengers include Mrs. Al Woods, wife of a New York theatrical producer, Mrs. Leo Frushauf, New York society woman and William Lewis, sportsman.

**INCONSTANCY CHARGED**  
Mrs. Martha May Henderson was granted a divorce from Daniel O. Henderson on the grounds of cruelty by Superior Judge Pope.

Represented by Attorney Heland Rich Woolley, the wife testified that during the entire time of her married life her husband kept company with other women. One of her complaints was that Henderson equipped a lingerie and ladies' garment store for a woman and turned it over to her to operate.

Mrs. Henderson also complained that Henderson who is the head of a motor vehicle transportation concern, named one of his buses after a woman.

**IMPROVEMENT ORDERED**  
On recommendation of its Public Works Committee, the City Council has granted a petition for the improvement of One Hundredth street between Broadway and a point 110 feet east of Figueroa street, and instructed the city engineer to prepare the necessary plans and specifications.

The Times-Mirror Company is a corporation organized for the purpose of publishing newspapers and other publications. It is a member of the Associated Press and the United Press.

**Today's Bible Text**  
 O Lord, be gracious unto us; we have waited for thee: be thou their arm every morning, our salvation also in the time of trouble. Isa. xlii. 1.

**TALK IS CHEAP**  
 The poet says they always talk who never think. And think what they talk about!

**ALREADY FOUND**  
 A doorknob is better to make a name than inherit it, but the latter is the lazy man's way.

**MAY BE SO**  
 One encyclopedia magnate who offers Calvin Coolidge a dollar a word for his writings may be surprised to find how prolific the ex-President can be when the rules are reversed.

**UP IN THE WORLD**  
 New York is to have a new hotel that will be sixty stories in height. A boss who tries to sneak out of the window of that tavern with his grip will need a parachute and rubber boots.

**HIS HOPE CHEST**  
 Little Willie wanted to know if the Cabinet was where Mr. Hoover kept his tools. They are not exactly that and yet they are supposed to do the work they are fitted for according to the Presidential touch.

**THE PIE HABIT**  
 Washington gossip has it that President Hoover is always insistent upon his piece of pie on the menu for his luncheon. In this respect he will strike a responsive chord in the bosom of the politicians of his own or other party.

**WHAT PRICE BEES?**  
 In a law suit over a hive of bees an Illinois judge fixed the price of the buzzing insects at approximately three for a dime. If they are to be transferred by hand and counted over at that rate we don't want any. We will buy our honey at the feed store.

**SOMETHING IN THE WIND**  
 California Institute of Technology has a new feature of equipment. This is a wind tunnel in which gales up to 200 miles an hour can be created and studied. This should be a fine thing for the Washington Senators to play with. In the meantime it may be used for mastering some of the problems of aviation. Where does the wind go after it has blown its brains out?

**PARTY MACHINES**  
 All Smith proposes to keep the Democratic party alive between elections. It is not to be merely a quadrennial wall of protest. It is to be offered to the people as a going concern. But there are others. Dr. Hubert Work, chairman of the National Republican Committee, intends to keep his machine running in perpetuity. The organization will neither quit nor even slow up just because it has accomplished the election of Hoover. There will be steam under the cinders at all hours.

**LITTLE KITCHENETTA**  
 The annual food show will be opened with a broom tournament in which a flock of ambitious young housekeepers will indicate their prowess with this kitchen tool. No, they will not wear bathing suits. This is one stunt in which the damsels are supposed to appear in aprons. Neither will the prize go to the girl who kicks up the most dust. The money will go to the maiden who wields the broom with the most skill and effectiveness. There are still a lot of damsels in the country who know what a broom is for without having to have a blue print.

**GRAIN PROSPECTS**  
 Tom Campbell, our Pasadena farmer, says that the Russian soviet is about to plant a million acres to wheat the present season, but the leaders have ultimate ambitions of regularly placing 20,000,000 acres under this crop. This would make Russia a force in determining the world supply. Russia must have our farm implements and road-making machinery preparatory to this program. But if Russia is going into legitimate production and honest toil the country will be gradually weaned from its communitistic contacts. Russia has the resources and people to save itself.

**SUN-UP IN CHINA**  
 There is far more of world significance in the Chinese mass education movement than is seen by many who have read with indifferent interest the report of the local address of Y. C. James Yen on the subject, though it must have stirred the imagination of discerning people who realize what that movement means not only to China, but to the whole world and particularly to the western coast of America. Mr. Yen told his Los Angeles auditors that of the 400,000,000 people of China 70 per cent are now illiterate. He and his colleagues of the Chinese Educational Association have gone seriously to work greatly to reduce that percentage in a few years and intend eventually to wipe it out.

To accomplish this the written language of the Chinese, now composed of an enormous and confusing number of characters, is being simplified and standardized, only 330 characters being listed in the new alphabet instead of the 1,600,000 that have been and are still generally employed in the different provinces. The association began its work four years ago and now has more than 5,000,000 students enrolled, with nearly 120,000 teachers.

Extending and expanding from year to year, the effect of this great work in another decade, perhaps less, will be nothing short of revolutionary. A new light will shine upon Asia and that light will be reflected all over the world. It should be born in mind that the Chinese great mass of Chinese often are referred to as illiterate, their illiteracy is not of that crude, stupid order which cannot readily be made to bear fruit in culture of a really high order. This illiteracy may be likened to certain desert regions of this coast with a soil which needs water to become almost miraculously fruitful.

Under the broad sweep of the new educational movement, the great mass of Chinese, with their native intelligence, honesty, industry and frugality, will be given that opportunity for modernization and the adoption of western culture, which for centuries has been their greatest barrier from participation in and contribution to world progress and world welfare.

With a simplified and standardized language—one that can be learned by outsiders and employed in the arts, religious missions and trades—China, with its great wealth of natural resources, can step out as a nation equipped to deal with other nations on a free and equal basis. The various provinces, now virtually isolated from one another by linguistic boundaries as well as by those imposed by the like or inland customs stations, will be relieved of their isolation and become a true union in which the needs of this country which enjoys free communication of every kind.

With this free communication, united China will become world conscious and look about for world trade, the potentialities of which, often discussed, but never as yet even remotely realized, will soon be something more than a dream. The needs of this modernized China will increase a thousand fold and the people of the Pacific area, of which Los Angeles is the commercial capital, will be the market place where these needs will be met. The profit to China and to the Coast will be incalculable.

In this connection it is timely to stress again the importance of the recognition of the fact by our people that we shall acquire and continue the habit of looking upon the Orient as the Near West and forever discard the appellation of the Far East, which, though it may have relevancy and pertinence to the viewpoint of people in other parts of the globe, incorrectly dignifies remoteness what employed by the nearer and more closely related people of the Pacific Coast.

China has awakened and is marching forward, and we must meet her and help her in what is bound to be her triumphant course.

**FLOP COLLEGE**  
 Chicago social workers have founded a flop college. The tuition fee is a dime and hobbos have the right to a night's lodging. The attendance thus far seems to justify the undertaking. More than 100 students have registered. Night sessions and the stove are in full blast. Whether a thing for knowledge, or the unusually cold winter, has prompted enthusiasm, the special workers are silent. Such a university might not be a success in Los Angeles; the weather is too fine.

Lectures and discussions on civics, sociology, history, literature and kindred subjects are given by regular teachers from a nearby seminary. A course in public speaking is included in the curriculum. However, that term does not appear in the prospectus. They might say it at.

Judging from the oratory escaping from various vents at the Plaza and on North Los Angeles street at sundry points, the oration seems to be superfluous. How to wear muffs on the mouth might serve society better. If Calvin Coolidge could be induced to teach his variety of oratory in that college, many would highly approve.

Flop houses and flop universities may offer district advantages along some lines. In athletics, walking marathons and mouth marathons could be introduced with considerable success. However, if but a few hobbos can be kindled to better things by a little culture, or by bushing up on a college course forgotten, it will be a noble experiment.

**AMERICANS ABROAD**  
 From 320 consulates of the United States our State Department at Washington has gathered the information that 392,688 Americans reside abroad permanently, or semi-so.

Of these 77,063 live in Europe. France has 28,890, and not all of them are there for divorce. Great Britain has 11,711 more questions of 11,711 more homes around in Shakespeare's old home and at Westminster. About twenty-four thousand require Uncle Sam's gunboats to protect them in Asia. Japan, Africa and Australia have to put up with some 2000 or 3000 each. More thousands in Mexico, the South and Central America and the West Indies are bothered because the Spanish cannot understand their own language.

Many Americans have gone abroad as representatives of commercial houses and are engaged in legitimate trade.

# LEE SIDE O' LA

BY LEE SHIPPEY

FOR years a good many Californians have been earnestly saying that "something must be done." The old missions which are our richest historical monuments have been crumbling into oblivion, some having passed completely.

At San Juan Capistrano a priest with the fine old Spanish name of St. John O'Sullivan has saved one mission and is restoring it with such fidelity that future generations will see it almost as it was in the days of Junipero Serra. He began working with his own hands, and he worked so well that thousands now visit Capistrano every week—and he can employ workmen.

**How We Guard Our Treasures**  
 The chapel at San Juan Capistrano is the oldest building in California, the only church intact in which Father Serra officiated. Yet when Father O'Sullivan went to Capistrano in 1910 it was being used as a storage barn—for old lumber, barley, wool and olives. The roof was falling in, the rains soon would have crumbled even those seven-foot walls. And all about was desolation. A snag-toothed picket fence surrounded the mission. Some of the buildings of the once lovely place had slumped into the earth and nearly all were in ruins. About half the people who visited it did so with the idea of carrying away some substantial souvenir. Some even carried away tiles and building material with which to construct pig pens or cow barns.

**La Misión Vieja**  
 The mission at San Juan Capistrano was started in 1775, but most of it was destroyed by hostile Indians. The priest rebuilt the bell, then fled. In 1776 rebuilding started. Six other missions had been started before, but their older buildings crumbled during the years of neglect, so that only the chapel at Capistrano remains as one distinguished by the presence of Father Serra. His records show that on October 23, 1775, Father Serra preached there and confirmed a class of candidates. The next day he baptized many Indians there, and later paid the church another visit. Records of baptisms and other proceedings in Father Serra's handwriting are among the treasured proofs. A stone church, the finest in California, was built a little later, but in the earthquake of 1812 it was destroyed, killing thirty-nine persons—while the adobe chapel stood.

**Landmarks Club to Rescue**  
 In 1923 Mexican soldiers seized the mission, in line with the government's program of confiscation, and the historic pile was subjected to all the indignities of which roystering soldiers

Thousands of missionaries are teaching in foreign lands. Immigrants often come to this country for gold and then go back to their homelands to spend the rest of their lives. Americans go abroad for study and bring back rare books, pictures and a wealth of knowledge that enriches our own wisdom.

Our innocents abroad are usually tourists. They go home and then go back to their homelands to spend the rest of their lives. Americans go abroad for study and bring back rare books, pictures and a wealth of knowledge that enriches our own wisdom.

**A YEAR OF NO-PARKING**  
 For a little more than a year the parking of automobiles in the Loop, the principal business district of Chicago, has been strictly prohibited. When the ordinance was first proposed the Loop merchants opposed it bitterly on the ground that it would mean a loss of business to them. The other day a committee of the Chicago City Council held a public hearing on the no-parking rule with the idea of obtaining suggestions as to whether or not it should be discontinued. No objectors appeared, and the ordinance will continue in effect.

In reviewing the operation of the no-parking rule, Charles Gordon, a Chicago traffic expert, says that at present the streets in the Loop impress the casual observer as being almost empty, and yet they are carrying a far greater volume of automobile traffic than before the ordinance went into effect. By actual count it was found that the number of motor vehicles entering the district in May, 1928, when the ordinance had been in effect several months, was nearly 20 per cent greater than two years earlier, when parking was permitted. The speed of general traffic has been increased from 18 to 33 per cent over that for the period prior to January, 1926, the running time of surface street cars has been improved and the number of traffic accidents has been considerably decreased.

It has been found that the street cars used to bring nineteen customers to the department store to every one that the parked private motor car brought, and that they are now bringing a still greater proportion, as auto parks are not numerous in the district.

On the whole the new system seems

could think. Men bivouacked and horses were stabled in consecrated buildings. For years afterward it was a pathetic sight. When the Santa Fe Railway reached Capistrano—and many people thought it never would reach farther—thousands of excursionists visited the mission and came home loaded with souvenirs. But for efforts of the late Charles F. Lummis and the Landmarks Club it would have been utterly destroyed. The Landmarks Club saved it for California, but it seemed almost hopeless ruin in 1910.

If those who saw it then could see it now they'd be surprised. An adobe wall surrounds it, built in 1917, but already looking ancient because so many motorists have run into it. One enters under a lovely arch, into a charming old-fashioned garden, with restored buildings on each side. The one passes into a patio containing an acre of ground, beyond which is a large school building, entirely reconstructed from a crumbling ruin that one cannot tell what parts of it are old and what are new. Even the slippers of a dinosaur, the entire monster from it have hardly achieved a more difficult task, but there is this difference: Sometimes when one looks at the reconstructed monsters which scientists show he wonders if such creatures ever really existed. But the reconstructed parts of San Juan Capistrano are completely convincing. They are so perfectly in keeping with the old chapel and other parts which were intact but needed strengthening that all have precisely the same atmosphere—the atmosphere of adobe days.

**"Faith and Two-Bits"**  
 "The Iowa farmers are helping us do this," Father O'Sullivan said. "We found we could not count on large contributions from wealthy persons. It was better to put a turnstile at the gate and let everyone pay a quarter—and to try to give him a lesson in California history worth more than that." We have six guides, well prepared to tell the story, who show visitors around.

"Have you really done all this with quarters?" we asked. "Oh, dear, no, it isn't all paid for yet," said the padre. "It just had to be done, so we got it done. If we had waited it would have been too late. So it's a combination of faith and two-bits."

And the results are so beautiful that nearly any time one goes there he will find artists sitting in the garden or patio, sketching. And there is a little art gallery, hung with pictures, some by notable artists, painted there.

## IS ANOTHER ICE AGE COMING?

BY RANDOME SUTTON

All the newspapers agree that this has been the worst winter in Europe since weather bureaus were started. And geologists say that since the days of the cavemen the earth has passed through four frightful glacial periods. Prior to that time the whole world was warm—most of the time. Long periods of warmth, varied irregularly (possibly regularly) with almost-as-long cold spells, like that at the beginning of the Age of Mammals, which sent the cold-blooded dinosaurs shivering to their graveyards. The records of those ancient ice ages are mostly obliterated, but the scars on the face of Mother Earth scratched by the last four are still visible.

Not only has climate changed, weather bureaus and meteorological records, human beings will soon be able to find out whether to prepare for warmer or colder weather.

**WHERE CAN I LEARN**  
 To Interpret Dreams?  
 BY LOUISE L. TEMPLE  
 [Prepared in co-operation with the Los Angeles evening high schools. Questions concerning free evening classes will be answered if stamped addressed envelopes is enclosed. Address: Louise L. Temple, care of The Times.]

Since the earliest biblical times men have striven to interpret dreams. First they were believed to be warnings from heaven; next, symptoms of indigestion; and now, the workings of the untrammeled subconscious and more valuable than many reasonings of the repressed waking ego.

At the Mount Vernon Evening High School, 4068 West Seventh Street, John H. Doeber, Jr., is conducting a class in modern psychology. Doeber has a complete library of the modern psychology in the city, and has been accepted by Freud as a pupil for the coming summer.

The aim of the class is the interpretation of the psychology of society and the individual. The whole course is comprised of forty lectures, the first four on personal psychoanalysis, and the last eight on modern psychology. Freud, Adler, Kemp, and other modern psychologists will be studied, with special attention to mental processes, mental hygiene, the interpretation of dreams, the basis of mental hallucinations, and the methods of developing memory.

This class meets Monday and Wednesday evenings from 7 to 9 o'clock. It is a part of the free public schools, and tuition is free. No text-book is required.

**CABLE VOLUME VS. HIGH CABLE RATES**  
 Retention of cable rates at 80 and 90 cents a word between the Pacific Coast and the Orient is as absurd, and consequently as unbusinesslike, as the retention of high prices and low sales volumes in commerce.

At the present rates, the cable only works a fraction of the time. With rates of 5 or 10 cents a word, that cable would work every hour of the day and night. And a volume of business would not only stimulate trade on the Pacific to a new pitch, but would result in new profits in cable operation.

If the cable cannot compete with wireless, the time has come to junk the cable and for Japan, China, United States and Canada to build great beam wireless stations that will properly handle business communications at reasonable rates.

Meanwhile, if there is an actual cost loss to cable companies in reduced rates and it becomes necessary to compensate them (as they should be compensated for cost loss) on the basis of the competition, why not have done with it. But the Pacific countries cannot afford to hold up world progress with rates that stifle trade across this hemisphere.

If cable rates are to be lowered or beam wireless stations erected, Canada must understand that the Pacific countries must do it themselves. Canada certainly cannot expect anything but opposition from England, because English trade in Shanghai, Hongkong, Singapore and other great beam wireless stations that will properly handle business communications at reasonable rates.

**WHISPERING WINDS**  
 Whispering winds threatening the sunbaked world of glory. Waking to vocal ecstasy the breathing leaves of trees. And rocking the headed grain to serried rhythm—

Whispering winds are we. Voices of the greater rhythms. Live in the winds and you shall know the voice of Mother Nature.

Whispering winds are the garments of God. When He plays with the children of earth. Playful they blow the hair about the face of the cheek. Kisses of angels and caresses of the infinite.

We linger in the tree tops and struggle at the base of swaying grasses.

Whispering winds are we—gentle, soothing, caressing. Love us, know the rhythms for we are living. You see us not, yet God's rhythms send us abroad. And without us life perishes on the planet.

**GUY BOGART.**  
 Cold Commerce  
 Lloyd's, the great British insurance company, will offer odds on most anything—from the possibility of having a baby to being engulfed by a tidal wave. Even King George VI it did quite good odds against his recovery.

## PEN PALS

If you would know a little more about the world, just ask the pen pals.

A free land is one that stands for any one who is interested in it. Some men remain in the world as they are, but some men stand for any one who is interested in it. Among the stars of the world, the children of the world, the fourth generation are the stars.

Nature balances things. The husband feels sorry for the wife. The wife feels sorry for the husband. The husband feels sorry for the wife. The wife feels sorry for the husband.

You're a pharisee. Sherlock Holmes. You're a pharisee. Sherlock Holmes. You're a pharisee. Sherlock Holmes. You're a pharisee. Sherlock Holmes.

When a modern youth wants to begin work as a clerk, he probably has to sign the signing of a check.

Americanism. Keep yourself as poor as the poor were by trying to live as rich as you can.

Trotky is a unique being. Unless you count the King Jew.

One reason why this home is because there is nothing to eat this side of the drug store.

The only word meaning "happy" and "full" is "frank."

There are no new words in the Webster's dictionary, the authorities believe the dictionary is sufficient.

Correct this sentence: "I knew you were taking the wrong train," said the lady on the back seat, "but I was saying anything."

The only thing greater than synthetic liquor is no liquor.

Any man who is a better man than a woman is a better man than a woman.

"Slow but sure" may be a good motto, but in argument it is the clockmaker's motto.

You marry her for her money, but in argument it is the clockmaker's motto.

Sharp as a needle, but in argument it is the clockmaker's motto.

My ears are frozen, but in argument it is the clockmaker's motto.

My ears are frozen, but in argument it is the clockmaker's motto.

## SACRIFICES HELD FOR WORLD

Glory and Thrill of Must be Felt for Holy Spirit, Say

While deploring intellectual errors we never forget that no amount of the place of that supreme emotion of itself, born anew out of self-centered passion for service to mankind.

"We need to bear crosses to make our lives more kindly. We need to bear crosses to make our lives more kindly. We need to bear crosses to make our lives more kindly."

Human nature and their relationship to religion and morality. Dr. Curberton

There are three elementary human emotions, fear, anger and love. Fear is the most common, anger is the most common, love is the most common.

What is the difference between a man and a woman? A man is a man, a woman is a woman. What is the difference between a man and a woman? A man is a man, a woman is a woman.

Electricity is Cheap... Have You Ever "OPTIPHOSIS"?

Optiphosis is the by lighting engineers to eye trouble caused by use of light.

Cause and Cure "Optiphosis" is eye trouble specialist can cure never prevent.

"Optiphosis" can be only by removing the proper lighting. Too much light or light; improperly applied harsh glare of direct, ex—all are causes of "optiphosis."

Light that's Right There is a right way to use right type and amount for every purpose—in office, store and factory.

Do your part to prevent "phosis" by seeing to it that work under proper conditions.

A Lighting Specialist Advice In solving this problem to you by simply calling Commercial Engineering Dept. FABER 5300.

## SOCIETY

**BY JUANA NEAL LEVY**  
March finds most of the regulars on the Riviera and a majority of the villas at Cannes filled.

Mme. Jacques Balam, the former Consuelo Vanderbilt, is at her Riviera chateau, where she has been entertaining her mother, Mrs. O. H. Belmont.

Mrs. Clarence Detwiler and her daughter have arrived on the Riviera from St. Moritz, Switzerland, by way of Paris and have taken the villa of Mrs. Charles Oakes in Cannes for the season. Mrs. Oakes is returning to America. Mrs. Detwiler will be joined on the Riviera by Mr. Detwiler, who is on one of the boats of the new service connecting directly to Cannes from America and making the trip in nine days. The Detwilers have an apartment in Paris on the Rue de Louvre.

The Conte and Contessa Constantini, the latter an American, have arrived at their villa in Cannes from America by way of Paris. They will be on the Riviera for the rest of the winter and the early spring.

Quite a stir in the Cannes season has been given by the arrival of Philip Plant. He has taken a villa in the Cannes section and will be there for the next two months. His step-father, Col. William Hayward, has sailed for the United States.

Another addition to the Cannes villa colony are Mr. and Mrs. Fred Lewicki, who remained in Paris until after the marriage of Mrs. Lewicki's niece, Miss Katherine Van Heekelen, to the Hon. Charles Winn. The Lewickis have one of the most beautiful villas in Cannes. It was formerly the property of Mr. and Mrs. Selon Henry, who, by the way, are off on a trip to North Africa.

Miss Mary de Witt Hopkins, who has an apartment in Paris in the Rue de la Trinité, is passing the winter in Cannes and she is one of the few of our compatriots who enjoys Cannes for its gorgeous scenery and its bright sunshine more than its casino entertainments. She has bought, this season, just off the Oratoire, in the new Palais de la Tour Maubourg, an apartment for her adopted son, Comte A. de Kersaint Gilly. Miss Hopkins is the daughter of the late W. A. Hopkins, who, curious enough, was the founder of the Paris newspaper La Matin.

Cap Ferratians who have been lashed for some weeks in the Villa Barillet, not far from their friends the Constantinis, are Mr. and Mrs. C. A. Sprengle. In the meantime, however, they are spending a few days in Paris with their daughter, Mrs. Lurline Sprengle.

Sir John and Lady Ward (nee Field) scarcely had set foot in their villa Rosemary in St. Jean Cap Ferrat, when they were called back to London by the death of Sir John's mother, Georgina Lady Dudley. They will return to the Riviera later.

When Mme. Juliette Metropolitan Opera diva, appears in "The Girl of the Golden West" in Vienna next spring, she will have a meticulously correct costume for the title role or there is a certain Californian who will loudly ask why not. A mysterious parcel has arrived at the State Operahouse in Vienna.

**To insure good BREAD which would you bake—ONB**

**Giant Loaf or several small ones!**

For the same reason Hills Bros. roast their famous blend of coffee a few pounds at a time by their patented, continuous process—"Controlled Roasting." No other process can roast coffee so evenly and insure such a delicious, uniform flavor.

**HILLS BROS. COFFEE**

Subtle "Illusion" Powder for Brunettes

Something new—a face powder that does not show that you have used powder! Easy to use, it will blend into your skin-tones and white, that any type of beauty can be developed to a point of ravishing loveliness with no other powder has yet been able to achieve. Its captivating rose-petal effect clings happily for hours, and its fragrance is simply bewitching. Choose your personal shade of Pansy today.

**A NEW, AMAZING ROUGE**

BE FIRST to discover Zanzibar, the new rouge. It will blend into your skin-tones and white, that any type of beauty can be developed to a point of ravishing loveliness with no other powder has yet been able to achieve. ## Of Interest to Women.

## CHEF WYMAN'S RECIPES

Every Tuesday and Friday at 1:30 o'clock Mrs. A. L. Wyman will conduct a free class and demonstration of good cookery in the lecture room of the Southwest Building, 130 South Broadway.

**ORANGE FUDDING**  
Sift together two cups of flour, two teaspoons of baking powder, one teaspoon of salt, and one tablespoon of sugar, rub into this three tablespoons of butter or shortening; add enough milk to make a stiff dough, roll out in an oblong sheet half an inch thick, brush with melted butter, and sprinkle with sugar cover the dough with a layer of peeled and thinly sliced oranges, roll up, tie in a buttered and floured cloth, place in a steamer or colander and steam for two hours. Remove to a hot platter, sprinkle with chopped almonds, and serve with a lemon custard sauce.

**LEMON CUSTARD SAUCE**  
One cupful of sugar, two cups of water, juice and grated rind of two lemons, one tablespoonful of flour, two egg yolks; sift the flour and sugar and mix with the slightly beaten egg yolks, and a little of the water. Add the lemon juice and rind, add the egg yolk mixture a little at a time and cook until thick.

**AVOCADO SALAD**  
Peel and dice two medium sized avocados, add an equal amount of cooked, diced celery (celery root).

From California, bearing a customer's declaration stating that the contents were "clothes and a horse harness." It contained a complete wardrobe of clothes and a horse harness.

An accompanying letter, signed Richard Jewett Scheppe, Los Angeles, stated that the donor has been residing in Vienna and felt annoyed at the incoherence of the star's outfit.

Michael J. Egan and Mrs. Irene Egan, of Hollywood, are registered at the Hotel Saint-James at Albany in Paris.

Mrs. Pauline Kline, wife of Dr. Max O. Kline, and her mother, have arrived at the Grand Hotel in Vienna after a trip through Germany and Austria.

Judge James R. Cooper of the Supreme Court of California, Mrs. Cooper and Miss Ethel Cooper are guests of the Hotel Majestic in Paris.

Philip L. Kuhl, Earl S. Debe and Paul M. Dring, who have been traveling in Germany, were recently visitors to Berlin, where they registered at the Hotel Bristol.

Miss Clara Wood of La Jolla, who has been in Paris for some time at the Hotel de Ville, is leaving shortly for Italy, for the remainder of the winter season.

Mrs. Charles T. Videaux of Los Angeles, who has been in Paris for some time at the Hotel de Ville, is leaving shortly for Italy, for the remainder of the winter season.

David Harrison has been stopping at the Hotel de Ville in Paris. He is a member of the American Express Company.

Max Goldman is stopping at the Grand Hotel in Paris. He is a member of the American Express Company.

Mrs. Hugh Pope Le Clair, wife of the assistant naval attaché at the United States Embassy in Paris, had as her guests of honor last week at a tea in her apartment in Paris Miss Katherine Mellon, the Misses Helen and Kate Winnett of Los Angeles, who are stopping at the Hotel Bristol.

Mrs. Julia Cunningham and Mrs. P. C. Kenny and son Robert are for several days in Paris, registered with the Hotel de Ville, the American Express Company.

Max Goldman is stopping at the Grand Hotel in Paris. He is a member of the American Express Company.

Mrs. Hugh Pope Le Clair, wife of the assistant naval attaché at the United States Embassy in Paris, had as her guests of honor last week at a tea in her apartment in Paris Miss Katherine Mellon, the Misses Helen and Kate Winnett of Los Angeles, who are stopping at the Hotel Bristol.

## YOUR BABY AND MINE

Mrs. Wyman will be glad to answer all questions pertaining to babies and children, and to give out recipes for all kinds of baby food. This department offers leaders on milk, cereals, fruits, vegetables, etc., and is a most valuable source of information for mothers.

**ENGLISH STEAK AND KIDNEY**  
Three small veal kidneys, three medium sized onions, two teaspoonfuls of salt, two pounds of round steak, one-fourth of a teaspoonful of paprika, fourth of a cupful of butter, remove the strings and fat from the kidneys and allow to stand for ten minutes in the salt water. Remove, dry and cut in slices, dice the steak and chop the onions fine. In a well-oiled baking dish place a layer of the diced steak, onions and butter, and sprinkle with flour. Sprinkle each layer with the seasoning, and a little chopped parsley. Add half a cup of water, and cover with a short blanching. Place in a hot oven for the first ten minutes, then reduce the heat and allow to cook slowly for one hour and a half.

**GUIDING YOUR CHILD**  
His Independence  
By Mrs. Agnes Lyne

The universal problem of the adolescent is that of achieving his emotional independence, of releasing himself from the bonds which would keep him forever a child. Whether the bonds are those of too much love or of defiance to parental authority makes little difference. Youth is held equally by both from attaining the maturity which makes sane, well poised men and women whose affections do not betray them and whose impulses do not lead them from the path they have chosen to follow.

In primitive periods the significance of this period of emotional liberation is fully recognized. The change from boy to man is accompanied with special rites which make plain that childish things must now be left behind forever, and that a new life of responsibility must be assumed. We who live in complex social environment, who care for our children, educate them, protect them, long past the age of adolescence, have forgotten this essential wisdom.

It is true that in the complicated world in which we live the period of preparation of necessity be prepared in a simple one. We cannot help obscure the problem by keeping our children in actual emotional dependence long past the age of childhood maturity.

It is, therefore, all the more imperative that we help our children achieve their moral, emotional and intellectual independence as early as possible. The adolescent must be allowed to make his own choices and his own mistakes; he must be left to bear the consequences, such as we would like to shield him.

If in the past we have maintained a proper relationship with him, if we have helped him develop his own standards and ideals, if we have kept his respect and confidence, he will do nothing disastrous. His errors will be the result of a true learning process. They will mature his judgment and strengthen his self-reliance.

**Mother Must Guard Name to Keep Children**

Modern husbands like old-fashioned wives, Superior Judge Rosenkrantz told Mrs. Pearl P. Gilliam, 3621 Boyce street, when the question of the custody of Mrs. Gilliam's two children came up in court yesterday.

"If you want to keep your children, you must keep your reputation," Judge Rosenkrantz told Mrs. Gilliam, whose husband, E. E. Gilliam, has been charged with desertion. He said that she was going to parties and dances with other men.

"A mother of children can not afford to risk what people say, even though modern custom permits a woman to run around, even though her intentions are honorable and her actions innocent."

"Because your children are so young I am going to let you have them," the judge said. "But if you go to parties and dances with other men, I will take them away from you."

Judge Rosenkrantz investigated reports that Mrs. Gilliam had been drinking too much, and advised her to go light with the slipper and the hair brush.

Those children were old enough to be punished severely, he might not hold that their mother, in this instance, is the better guardian of them," was the court's warning.

**HEATING OF GRIFFITH PARK POOL DENIED**

Requests from patrons of the Griffith Park swimming pool that it be heated have been filed by the Playground and Recreation Commission on report of Supt. Helle, who informed the commission that a heating plant will cost \$11,400 and that health authorities appear to agree that it will be hazardous to encourage outdoor swimming in a heated pool.

# **WOMEN COST MORE THAN MEN**

This Particular Reference Is to County Jail Prisoners, Where Females Maintain Reputation for Expense; They Have Three Meals to Two for Males

It costs Los Angeles county more to keep women prisoners than men, according to the annual report of Jailer Clem Peoples, to be submitted to County Auditor Payne and the Board of Supervisors today.

The reason for the higher cost of female prisoners is that they are served three meals a day instead of two, Jailer Peoples believes that the men eat about as much in two meals as the women do in three, however, so the figures may be misleading.

"It is a fact, however," said Jailer Peoples, "that practically every woman who serves a long sentence in jail comes out much fatter than when she went in. How much of this is due to excess food and how

much to lack of exercise, only an expert dietitian could determine."

Sheriff Traeger's annual recommendation that a county workhouse be provided to give prisoners proper exercise and the same gainful occupations now available at the Sheriff's honor camp, is expected to be made as a result of the publication of the figures that show the County Jail costs the county \$464,036 annually, the cost of maintaining each prisoner being about 67 cents a day, exclusive of meals.

Sheriff Traeger has stated many times that prisoners employed in workhouses or county farms could be almost, if not quite, self-supporting.

**COURT AREA SPLIT INTO THREE PARTS**

Change Requires Naming of Division in Future Federal District Cases

By the provisions of a recent amendment to the Federal laws the Southern District of the United States District Court is now formed of three divisions. It was stated at the Federal building today that the new divisions of the court are known as the Northern, Central and Southern divisions.

The northern division includes Fresno, Kern, Kings, Madera, Mariposa, Merced and Tulare counties.

The central division includes Los Angeles, Orange, Riverside, San Bernardino, San Luis Obispo, Santa Barbara and Ventura counties.

The southern division is made up of San Diego and Imperial counties.

These changes, it was stated, will require that actions filed designate the division of the court in which the case falls.

**OFFICIAL'S PARENTS HERE**

Mr. and Mrs. Joseph A. Head, parents of David B. Head, United States Commissioner here, are visiting their son at his residence, 1938 Hill Road, South Pasadena.

Mr. Head, Sr., is a prominent manufacturer of Hillsboro, O. The couple intend to stay here a month, visiting interesting points in Southern California.

# **Forging Ahead!**

## **Significant Facts for Advertisers**

**T**HE Sunday Times with only four issues during February printed 48% more real estate want ads than were printed by all Los Angeles afternoon newspapers during the twenty-four February weekdays.

Among week-day newspapers, the daily Times, due to its large circulation among real estate buyers of all classes, is the one newspaper that maintains a high degree of real estate interest throughout the week.

When Sunday is analyzed by itself, an equally amazing situation is disclosed.

The Sunday Times during February exceeded the second Sunday newspaper by 778 city house and lot want ads, by 566 suburban and country property want ads, by 1,362 real estate exchange want ads, and by 1,194 other classes of real estate want ads.

How completely the Sunday Times has captured the Sunday real estate market, is shown by the fact that it is now the only Los Angeles Sunday newspaper giving its readers the news of real estate.

It is not surprising that a Sunday circulation which can sweep the real estate field clean, is also the top-notch circulation for the sale of everything.

People who buy homes must furnish them; lot owners are the ones who buy building materials; families that rent flats must purchase food and clothing. The newspaper that guides the community in real estate matters is bound to be the great selling medium all up and down the line.

The Sunday Times is concentrated in Southern California. It is read by adults. It goes to the home. During the single month of February it led the second Sunday paper by 98,000 agate lines of paid advertising.

# **Sunday Times**

*Supreme Newspaper of the Week!*

# **Santa Barbara Admits Need of Water Softener**

SANTA BARBARA, March 10.—City officials are agreed that Santa Barbara badly needs a water softening plant, but they expect to postpone one until the city has secured a loan from the Federal Reserve Bank.

Most industrial plants using water in boilers have been ordered to install private water softeners at a cost of from \$1000 to \$2000, according to City Health Officer E. E. Bacon, who has made a study of the situation and recommended the installation of a municipal plant.

The initial cost of such a plant would be approximately \$50,000 and the annual operating cost would be \$40,000, according to E. E. Bacon, who has made a study of the situation and recommended the installation of a municipal plant.

It would be necessary to build the plant at Gibraltar Dam, according to both Bacon and E. E. Bacon, who has made a study of the situation and recommended the installation of a municipal plant.

because a large amount of water must be used daily in the city. By building on the Gibraltar Dam, the plant would be on this side of the range, the water would be wasted, three feet.

A plant using 2000 pounds of lime and 800 pounds of soda every million gallons of water purified is being considered by E. E. Bacon, who has made a study of the situation and recommended the installation of a municipal plant.

The capacity of the plant would be 6,000,000 gallons a day.

**Pomona Moving Gigantic Crop**

POMONA, March 10.—With a total of 875 carloads of new oranges having been shipped to market since January 1, the city of Pomona is moving a record crop.

R. L. Knox, manager of the Pomona Fruit Exchange, estimated that the city would be handling by the end of the present season, the largest crop in recent years.

Last week the exchange shipped 180 cars of oranges and 100 cars of lemons, unprecedented loads from eastern markets.

Local packing-houses are working at capacity. Although the packing season has been made the last six days, over half of the present crop still remains to be packed.

While most of the fruit is packed to eastern, southern and foreign markets, a large portion is finding its way to foreign markets.

A marked increase in volume was noted this year.

**Council to Hear Contractor's Plan**

MONROVIA, March 10.—The City Council will hear today the plan of the contractor, George W. Horton, to build a new city hall.

Councilman W. W. Horton is the man on Tuesday evening, the contractor, will make his plan known to the city council.

George W. Horton has been ordered to submit a plan to the city council.

providing the Police Safety Commission considers the plan.

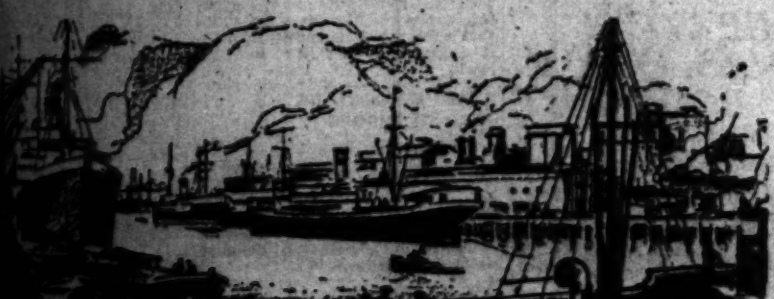

will set forth their recommendations to the City Council.

George W. Horton has been ordered to submit a plan to the city council.

providing the Police Safety Commission considers the plan.

will set forth their recommendations to the City Council.

George W. Horton has been ordered to submit a plan to the city council.

inspires confidence in a Greater Los Angeles, City and County

Any. Chaffey

# **A New Golden Age**

The wealth of this state in the gold it has taken out of the ground in the last eighty years is as nothing compared to the wealth of its cheap water transportation, and agricultural, industrial and world trade opportunities.

Los Angeles cannot help becoming the center of this golden stream of prosperity..." So said Edward A. Filene, of Boston, internationally known merchant. Isn't that a statement to inspire confidence; doesn't the fact that \$100,000,000 worth of modern ocean vessels are being built or

have been announced to serve California ports bring to your vision Los Angeles port—man-made—taking its place among the greatest shipping centers of the world? California Bank, with its affiliated institutions, in the past has aided in bringing about this New Golden Age. It will continue so to do.
